

Surrey Uni studies the climate friendly way to grow our lettuces

17 September 2025

Vertical farming has been hailed as a futuristic answer to Britain's food security challenges - but a new study led by the University of Surrey suggests the picture is more complicated.

The research, published in *Food and Energy Security*, found that while vertical farms can deliver extraordinary crop yields and use far less water than traditional fields, their carbon footprint still exceeds that of soil-based farming.

What is vertical farming?

Unlike conventional agriculture, vertical farms grow crops indoors, often in stacked trays under carefully controlled light, temperature and humidity. Plants are usually grown without soil, using hydroponic or aeroponic systems that deliver nutrients directly to their roots. This means vertical farms can operate in cities, warehouses, or disused buildings - and, crucially, they are not dependent on weather or seasons.

Proponents argue that this approach could free up farmland for nature, cut transport emissions by producing food closer to consumers, and help guarantee supplies as climate change disrupts traditional growing regions.

The Surrey-led study

The University of Surrey team compared lettuce grown in a commercial UK vertical farm with lettuce from two UK field farms - one on mineral soil and one on peat - and with Spanish farms, which supply around 95% of Britain's winter lettuce.

They found that vertical farms can produce more than 20 times the yield of field farms: around 97 kilograms of lettuce per square metre, compared with just 3.3 kilograms outdoors. Water use is also dramatically lower, at 0.9 m³/kg compared with up to 7.3 m³/kg in Spain.

But the greenhouse gas emissions are still higher. Even when powered by renewable energy, vertically farmed lettuce produced about 0.93 kg of greenhouse gases per kilogram, compared with 0.57 kg from UK field farms.

Energy and materials the key hurdles

Much of the carbon burden comes from the heavy energy demands of lighting and climate control, as well as the jute fibre plugs used to support plant roots. Researchers estimate that swapping these for alternatives such as coconut coir could cut the land footprint of vertical farms by more than 95%.

Michael Gargaro, Postgraduate Researcher at Surrey's Centre for Environment and Sustainability and lead author of the study, said:

"Vertical farming has the potential to transform food security in the UK, particularly as climate change and seasonal drought place growing pressure on traditional agriculture. Our research shows that while the technology can bring far higher yields and reduce water use, it currently comes with a higher carbon cost. The challenge now is to make vertical farming more energy-efficient and better integrated with renewable systems, so that it can become a truly sustainable solution."

Dr Zoe M Harris, Director of the Centre and Co-Director of the Institute for Sustainability, added:

"With around 95 per cent of lettuce imported from Spain during the winter months, advances in vertical farming make it possible to secure a year-round supply of fresh produce while freeing up land for restoration. But to viably compete with field farming, vertical farms must cut their energy use and rethink the materials they rely on."

Can vertical farms really feed the UK?

The study concludes that vertical farms are not yet the most sustainable option for lettuce. But with further innovation - particularly in energy efficiency and material use - they could become an essential part of Britain's food system. For now, they remain a promising supplement to, rather than a replacement for, traditional farming.

The research was funded by the Biotechnology and Biological Sciences Research Council (BBSRC) and the Engineering and Physical Sciences Research Council (EPSRC).

New Centre at Nescot gives vision impaired students “the best of both worlds”

17 September 2025

A new Centre of Excellence for vision impaired young people has opened at the North East Surrey College of Technology (Nescot) in Ewell.

The initiative is run by the Royal Society for Blind Children (RSBC), which has until now only operated its post-16 education hub at Dorton College in Orpington, Bromley. The Surrey launch marks the charity’s first step in expanding its unique “hybrid” model of education beyond London.

A hybrid model of learning

The RSBC approach combines mainstream college life with specialist support tailored to blind and partially sighted students aged 16 to 25. Lessons at Nescot are shared with RSBC staff in advance, allowing them to adapt materials into Braille, large print, coloured text or raised diagrams.

Students also take specialist sessions in Braille, mobility and assistive technology, supported by dedicated Learning Support Assistants. The aim is not only academic success, but building the confidence and independence to prepare for adult life.

Under the model, learners divide their time between their local college and the RSBC hub. It is a system that has delivered strong results in Orpington, where 98% of students achieve good educational outcomes despite half having previously experienced unsuccessful placements elsewhere.

Partnership with Nescot and Surrey County Council

Julie Kapsalis, Principal and Chief Executive of Nescot, said:

“We are delighted to partner with RSBC to host the new Centre of Excellence. Our college community is enriched by its diversity, and we believe all young people should be able to access quality education and support. This partnership is a fantastic step forward.”

RSBC Education Director and Executive Principal Josie Grainger-Francova added:

“Young people with vision impairment are so often excluded from the full education experience. Combining RSBC’s specialist expertise with Nescot’s broad curriculum and inclusive environment, we’re creating a blueprint for what high-quality, person-centred provision should look like. We’re proud to be expanding and supporting even more young people to thrive.”

From Surrey County Council, Eamonn Gilbert, Assistant Director for SEND Commissioning, said:

“The new Centre of Excellence marks a significant step forward in how we support learners with visual impairments in Surrey. RSBC’s proven track record, combined with Nescot’s welcoming and ambitious culture, creates an exciting new post-16 offer for young people with visual impairments.”

A student view

For learners like 19-year-old Lee Roake, the new centre is already making a difference. He said:

“It’s so much more convenient for me to travel to Nescot – previously, I had to commute four hours a day to college. It’s a really inclusive space and I’m supported to be as independent as possible. It’s nice to meet people who are similar to me, too. For me, it’s the best of both worlds.”

About the organisations

The Royal Society for Blind Children is the only specialist post-16 education provider for vision impaired young people in London and the South East. More details: www.rsbc.org.uk

Nescot, based in Ewell, provides a wide range of further and higher education courses from vocational training to degree-level programmes. More details: www.nescot.ac.uk

Surrey expansion of SEN places

17 September 2025

An 'Outstanding' Surrey school could open a new satellite site at another primary- around eight miles away.

Surrey County Council has revealed plans to expand a top-rated school for children with severe learning difficulties. Woodlands School, in Leatherhead, could have a second location at Cranmere Primary and Nursery school in Esher - a mere 25-30 minute drive away.

The move would create up to 28 extra places for children with severe learning difficulties and autism, all of whom have an Education, Health Care and Plans (EHCPs).

Currently Woodlands only has room for 83 pupils - though it has been squeezing in an extra 16 thanks to temporary classrooms.

Meanwhile Cranmere Primary, which has been rated 'Good' by Ofsted, has been running under capacity for years because of falling birthrates, council documents state. The building can take 630 pupils, but numbers have dipped enough there's now space to share.

The part of the Cranmere site earmarked for the expansion will need adapting so it can properly meet the needs of Woodlands pupils, according to reports. The work is said to have been planned to take place over the summer holidays, ready for a gradual roll-out of places from October 2025.

Surrey County Council says the set-up makes sense both for families and the budget. Officers say having local specialist places means children do not have to travel far away to school.

By providing places within the state system, the council's education bill drops and saves money for the taxpayer. Should these pupils be required to attend an education provision in the independent sector, costs would equate to around £1.484m per year every year. This is compared to the average cost for state-maintained specialist places of £644k.

Staff at the new site will be employed directly by Woodlands School and numbers will grow slowly over time, depending on demand.

The council says the move is part of its wider ambition to increase high-quality specialist school places across Surrey as the number of children with EHCPs continues to rise- with a 10 per cent increase expected over the next five years.

The current stage of the consultation will close on Friday 5 September 2025

Prostate cancer vaccine research launched in Surrey

17 September 2025

In September 2025, The Prostate Project, a Guildford-based volunteer-led charity, will launch a £250,000 campaign to

raise funds for a prostate cancer research project widely anticipated to be ‘game-changing’.

Work has begun to develop a vaccine to prevent the return of prostate cancer in men who have undergone a radical prostatectomy, the surgical removal of the prostate. Cancer vaccines have become an exciting area of research in recent years, and this new treatment could potentially save the lives of more than 1,500 men each year in the UK alone.

The Prostate Project, based at the Stokes Centre for Urology at Royal Surrey County Hospital, has a proven track record of funding research and treatment of prostate cancer, raising more than £11 million since its formation in 1998.

During this time the charity has provided funds for research at the University of Surrey, leading directly to breakthroughs in the diagnosis and treatment of prostate and other urological cancers. The university team is one of the leading groups for immunotherapy research in the UK, and is recognised around the world for its work.

This latest initiative is part of the charity’s longstanding and ongoing support for the work of Dr. Nicola Annels and Dr. Guy Simpson and their team based at the University of Surrey.

A patent has been applied for the vaccine and Dr. Simpson has already proven that it works in the similar treatment of bladder cancer. This new research is required to see if the vaccine works as effectively for prostate cancer patients.

Dr. Guy Simpson, Research Fellow Oncology at the University of Surrey explains:

‘The research will focus on a ‘prime-boost’ vaccine strategy. The new cancer-killing virus, known as HSV5-15 developed by our team at the University of Surrey will be used as an immune ‘priming’ vaccine along with a prostate specific mRNA vaccine to ‘boost’ and maintain this immune response against the prostate.

mRNA vaccines have already proven to be revolutionary in preventing COVID, and this technology is promising similarly effective results in treating cancer tumours.

The vaccine trains the body’s immune system to recognise cancer cells so any that return after surgery can be hunted down and killed, reducing the risk of the disease coming back. Around 5,000 radical prostatectomies are performed each year in the UK, but between 20% and 50% of men who have their prostates removed will have their cancer return, resulting in them undergoing further radiotherapy and/or hormone therapy.

This treatment is costly, time-consuming and can have unpleasant side effects, and is not always completely successful.’

Prostate Project Chairman, Martin Davies, expands on the fundraising initiative:

‘For over 25 years the Prostate Project has been proud to support a team that is quite rightly recognised by their peers for their work in immunology research, and this latest initiative is perhaps the most important yet. We are looking to raise £250,000, a target that we recognise as ambitious but completely achievable, especially given our past record, and the significance of the potential outcome.’

A final word from Dr. Simpson on the timescales for delivery.

‘This funding will support the initial 18 month research period, but the more money that we raise will have a significant effect on timescales.

The Prostate Project website www.prostate-project.org.uk features a comprehensive FAQ page with answers to many of the questions about the vaccine and details of how to donate.

Epsom schools celebrate GCSE results

17 September 2025

Epsom schools have been celebrating another strong year of GCSE results, with both Glyn School and Rosebery School reporting exceptional performances from the Class of 2025.

At **Glyn School**, 86% of students achieved grade 4 or above in English and Maths, with 66% reaching grade 5 or above. Disadvantaged pupils also excelled, with 84% attaining grade 4 or better in the core subjects. Among the top performers were Joshua Ellis (eight grade 9s and three grade 8s), William Unsworth (eight grade 9s), and Frederick Browning (eight grade 9s). Twins Hamish and Oscar Donald also secured a string of solid passes, while Chelsea Football Club player Reggie Walsh managed to complete seven GCSEs alongside making his debut for the club’s first team.

Students reflected on the hard work behind their achievements, with Nicholas Cooper noting: “It was hard work but worth it,” and Joshua Ellis adding: “I’m really happy with my results, and I want to thank my teachers for helping me

achieve them.”

Headteacher Jo Garrod praised the determination of staff and pupils, while James Nicholson, CEO of GLF Schools, described the outcomes across the trust as “a fantastic set of GCSE results.”

Meanwhile, at **Rosebery School**, the celebrations were equally jubilant. One in three exam entries was awarded a top grade 9 or 8, and half of all results fell between grades 9 and 7. Ninety-one per cent of students achieved grade 4 or higher in both English and Maths, and more than 80% reached grade 5 or above. In Maths and Science alone, Rosebery girls achieved 128 grade 9s.

Individual highlights included Iris Aryeetey and Eilidh McFarlane, who each achieved ten grade 9s, while twins Grace and Hannah Black amassed a remarkable 15 grade 9s and five grade 8s between them.

The school’s overall performance set new records, with an average grade of 6.4 and an Attainment 8 score of 64. Headteacher David Lach said the results placed the cohort among the top 5% of schools nationally and praised both staff and pupils for their resilience during what he described as a “tragic and difficult academic year.”

With both schools celebrating record results following last week’s strong A Level outcomes, Epsom students appear to be ending the summer term on a high.

Let your A level winners be creative says Epsom’s Arts University

17 September 2025

Ahead of A-level results day and Clearing, University for the Creative Arts (UCA) has written an open letter to parents and carers asking them not to discourage their children from making the creative choice and ultimately pursuing their dreams this week.

UCA writes on behalf of the children that came before, those that didn’t choose games over geography, marketing over medicine or animation over accounting due to pressure from their parents and carers, of which there are many examples posted on the online community, The Student Room. *“I’m honestly just doing linguistics for my parents. They expect me to get a ‘good’ degree, to get a secure job – they think working in the film industry won’t get me anywhere.”*

The University, which for nearly 170 years has delivered creative education, acknowledges it’s only natural for parents and carers to feel uncertain when children say they want to pursue a creative subject. *“We understand the hopes and concerns that come with guiding children’s higher education and subject choice. Parents and carers want the best for them – a secure future,”* says UCA’s Vice-Chancellor, Professor Melanie Gray.

This is reinforced in UCAS’ Project Next Generation report, which states parents want to guide their children towards the pathways that have the best capacity for earning and stability. As a result, almost half (48%) of children in the report, agreed that they feel pressure from parents to make ‘good’ decisions about their education.

UCA reassures in the letter that ‘a creative choice is a career choice,’ with the creative industries worth £124 billion a year to the UK economy and support more than 2.4 million jobs. Long-term, the sector is also part of the Government’s modern Industrial Strategy – a 10-year plan backing the UK’s strengths with ambitions for eight high-growth sectors, aiming to increase productivity and create jobs.

Professor Gray, adds: *“With this letter we’re not reprimanding parents and carers, we’re simply asking them to support their children and have confidence in them choosing what they love. We have seen time and time again, children not pursuing their creative dreams, which now more than ever, have a secure future.”*

UCAS’ report acknowledges parents and carers play a pivotal role in the crucial choices children make about their future. It also shows children’s higher education choices are inspired by their passions. Support and reassurance, not pressure, is needed to empower children in their decision making.

Support ahead of A-level results day and Clearing is available on UCA’s dedicated webpage, uca.ac.uk/clearing for parents and carers, as well as those wanting to make the creative choice. On Friday 15 and Saturday 16 August, the University also welcomes anyone to tour its campuses and ask staff and current students questions. For those not yet applied

through Clearing, Staff will also make on-the-spot offers to those suitable.

Almost any listening environment on Earth coming to Surrey

17 September 2025

A new national audio hub featuring world-first acoustic facilities is being built at the University of Surrey, thanks to £2.2 million in funding from the Engineering and Physical Sciences Research Council (EPSRC). The facilities will allow researchers to simulate almost any listening environment on Earth, from a quiet living room or modern office to a vast concert hall, cathedral or bustling city street.

At the heart of AURORA³ (Anechoic and Universal Research Observation Rooms for Audio, Acoustics & AI) will be two world-class audio environments: a state-of-the-art anechoic chamber with a spherical loudspeaker array and a first-of-its-kind variable acoustics room capable of adjusting both reverberation time and physical volume at the push of a button. AURORA³ will be open to researchers from both academia and industry across the UK and globally, as well as to Surrey staff and students.

Professor Enzo De Sena, Director of the Institute of Sound Recording at the University of Surrey, and Fellow of the Surrey Institute for People-Centred AI, said:

“AURORA³ will create a national hub for excellence in sound and AI, allowing researchers to generate reproducible data, test innovations in controlled and lifelike environments, and shape technologies that benefit society.”

The initiative aims to unite the Audio, Acoustics and AI (A³) research community and fuel breakthroughs in sound technology by enabling more accurate modelling of the physical and perceptual phenomena involved in real-world hearing. AURORA³ will pave the way for voice assistants and remote communications that are more robust to noise and reverberation, more immersive Virtual and Augmented Reality experiences for entertainment and virtual prototyping, and smarter hearing aid devices that better understand and adapt to the acoustic scene.

AURORA³ will be hosted at Surrey’s Institute of Sound Recording – part of the School of Arts, Humanities and Creative Industries – and co-led with the University’s Centre for Vision, Speech and Signal Processing (CVSSP). The facilities will also work in collaboration with the Surrey Institute for People-Centred AI, the CoSTAR National Lab, and is backed by a consortium of 18 partners and 12 key users, including the BBC, Meta, KEF, Imperial College London, the University of Cambridge, and non-profits such as the Royal National Institute for Deaf People and the Institute of Acoustics.

Professor Enzo De Sena continued:

“Combined with the UK’s deep AI talent pool and rapidly expanding computing capacity, AURORA³ provides the missing facility for audio data capture, placing the UK at the centre of global audio and acoustics research.”

Box Hill teacher with naked boy interest struck off

17 September 2025

A teacher has been struck off and banned from the profession after being found with hundreds of indecent images of children and a search history looking for naked young boys. Nicholas Heuvel worked at Box Hill School Trust in Mickleham, Dorking from September 1997 before resigning in 2017.

The school was a private boarding and day school until it merged with Reigate Grammar School and became RGS Surrey Hills in 2025.

Between January 2016 and January 2018, Mr Heuvel had up to 224 indecent images of children on his phone, including at least one of the most extreme kind. He also admitted to searching for terms including 'little boy nudists' and 'young boy speedos', between 22 October 2017 and 23 October 2017, and was given a police caution in 2021.

The Teacher Regulation Agency rejected Mr Heuvel's claim that he wasn't sexually motivated, finding no plausible innocent explanation and, on the balance of probabilities, that he was seeking gratification.

The panel, which concluded its findings on July 15 this year, said Mr Heuvel's viewing and searching for significant numbers of indecent images of children over a lengthy period of time were relevant to his position as a teacher. They said it amounted to serious misconduct and fell significantly short of the standards expected of the profession.

There was also a lack of any evidence that Mr Heuvel made any effort to report the images - which he would have known he needed to do by virtue of his role as a teacher and the safeguarding training he would have received.

David Oatley, on behalf of the Secretary of State for Education, said that the period of time with which Mr Heuvel used specific search terms to access indecent images of children was a significant factor and that the risk of repetition was high due to Mr Heuvel's lack of insight and or remorse into his actions and the impact that his actions had on children.

Mr Oatley said: "Mr Nicholas James Heuvel is prohibited from teaching indefinitely and cannot teach in any school, sixth form college, relevant youth accommodation or children's home in England. "Furthermore, in view of the seriousness of the allegations found proved against him, I have decided that Mr Heuvel shall not be entitled to apply for restoration of his eligibility to teach.

Hayley Robinson, headteacher of RGS Surrey Hills, formerly Box Hill School, said: "We very much support the decision of the Teaching Regulation Agency to regard the safety of children as the highest priority in our profession. "We note that Nicholas Heuvel was struck off for matters unconnected with allegations about his behaviour at Box Hill School and relate to the years 2017-18, nearly a decade ago. RGS Surrey Hills is now a member of the prestigious Reigate Grammar School group of schools, where safeguarding and pupil safety and wellbeing is at the centre of everything we do."

Former Surrey teacher avoids ban from profession

17 September 2025

A former science teacher and head of year at a Surrey private school has avoided a ban from the profession despite sending 'sexually explicit' messages to three colleagues.

Leishan Silva, 44, was sacked from Downsend School in Leatherhead following an internal investigation into complaints by three female staff about inappropriate and persistent behaviour.

He later admitted to the allegations during a private misconduct hearing held by the Teaching Regulation Agency (TRA) on July 11.

Messages sent by Mr Silva were categorised as "sexually motivated" by the TRA. He sent one colleague messages like "f*** me, you look amazing", "what's wrong with c**, it's natural?" and "your amazing boobs". He also suggested he would like to see one of them wear a bikini on a school trip to a water park.

Between 2018-2023, Mr Silva pursued sexual conversations with three colleagues. The social media messages displayed what the TRA panel called “a pattern of behaviour over a sustained period”.

Despite finding Mr Silva’s actions amounted to “unacceptable professional conduct and conduct that may bring the profession into disrepute”, the panel stopped short of recommending he should be banned from teaching.

Instead, they opted to publish the findings as a warning on the government’s website.

Also noted by the panel was Mr Silva’s “unblemished” disciplinary record and successful teaching career prior to the allegations. The panel said there was no evidence these concerns were brought to Mr Silva’s attention at an earlier stage.

His attention was drawn to these concerns retrospectively, so his poor conduct could not have been addressed earlier.

When the allegations were made by the three staff members, Downsends School launched an internal investigation, leading to a disciplinary hearing which resulted in Mr Silva being sacked from the school.

In mitigation, the panel noted Mr Silva had expressed remorse and insight regarding the harm and embarrassment he has caused to his female colleagues. He had also written apology letters to each of the colleagues. Mr Silva had told the panel that difficult personal circumstances at the time may have affected his judgment.

In isolation, the interactions with a colleague could be categorised as a ‘low level concern’ according to the TRA panel. But taken together, the panel said the messages showed a pattern of behaviour over a sustained period of time.

The report said: “Therefore, the cumulative effect of this repeated behaviour led to the panel’s determination that Mr Silva’s case amounted to unacceptable professional conduct.”

Concluding, the secretary of state said: “The publication of the findings made would be sufficient to send an appropriate message to the teacher as to the standards of behaviour that were not acceptable and that the publication would meet the public interest requirement of declaring proper standards of the profession.”

Epsom Charity Hears Students’ Plea: Cut the Cost of School Uniforms

17 September 2025

As school doors close for the summer, an Epsom-based charity has shared powerful testimony from local students who say the cost of school uniform is putting their families under severe financial strain.

The Good Company, known for running the Epsom & Ewell Foodbank and wider anti-poverty initiatives, has been working with five secondary schools in the borough through its ‘**Cost of the School Day**’ project. Its aim: to listen directly to pupils on free school meals and help schools better understand the hidden costs that prevent some children from fully participating in school life.

“The most important takeaway for us has been listening to the voices of these students, and their personal journeys,” said one participating Deputy Headteacher. “It is so powerful to hear from the students themselves.”

A recurring theme across all schools was the financial pressure of uniforms — particularly the insistence on expensive, branded items.

“A problem I experienced when I was new to the school is the cost of uniform itself. It put my parents into the red,” said Mike, a Year 11 student.

The findings echo national research. According to the Children’s Society, the average cost of a secondary school uniform in the UK is £422 per year per child, while for primary pupils it is £287. A 2020 survey by the Department for Education found branded items account for a significant proportion of the cost, often required to be bought from a single supplier.

In response to these concerns, the UK Government introduced the Education (Guidance about Costs of School Uniforms) Act 2021, requiring schools to keep branded items “to a minimum” and ensure uniforms are affordable. But campaigners say implementation remains patchy.

Local Action, National Relevance

The Good Company’s report suggests that real change comes when schools engage with students directly and respond with practical steps. Among the suggestions from students and staff were:

- Reducing the number of compulsory branded items
- Expanding second-hand uniform schemes
- Partnering with local charities to provide direct financial support
- Promoting understanding among staff about the reasons students may not always comply with uniform rules

The charity is calling on more schools to engage with its free online resources and consider reviewing their own uniform policies.

“Let’s keep working together to make schools a place where all children feel they belong, no matter their financial background,” said Tom Sefton, Director of Participation and Prevention at The Good Company.

More Information

Schools or individuals interested in learning more or accessing free training resources can visit: goodcompany.org.uk/cost-of-the-school-day

Creative Futures: Year 10 Taster Days at Epsom’s UCA

17 September 2025

The University for the Creative Arts (UCA), in collaboration with the Higher Education Outreach Network (HEON), is offering six exciting and inspiring Taster Days for current Year 10 students. These free events will focus on a range of creative disciplines including **Fine Art, Graphic Design, Animation, Acting, Textiles, and Creative Business**.

Taking place across UCA’s campuses, each Taster Day is designed to give students a hands-on introduction to life at a specialist creative university. Participants will have the opportunity to work closely with practising artists, experienced academics, and current UCA students. Through engaging workshops and interactive sessions, students will gain valuable insight into what it’s like to study and work in the creative industries.

These experiences allow students to explore the university’s professional facilities, including industry-standard studios, workshops, and software. Whether it’s using digital design tools, experimenting with materials, performing in rehearsal spaces, or developing their own summer music festival, these Taster Days are designed to develop creative confidence and key skills that can support students as they enter Year 11 and begin to think seriously about their future pathways.

UCA partners with HEON, a network of universities and colleges working together as part of the Office for Students’ Uni Connect programme. HEON’s mission is to raise awareness of higher education and help young people from North Hampshire and Surrey to make informed, confident choices about their next steps. By offering engaging and supportive activities, HEON aims to open doors to higher education for students who may not have previously considered it.

The Taster Days form part of this wider commitment to student outreach and aspiration-raising. They provide a first-hand experience of what it means to study creative subjects at a higher level, while also showcasing the range of career paths available in the creative industries, from visual arts and media to performance and entrepreneurship.

These Taster Days are not just about creativity – for many, it’s the first time they’ve stepped onto a university campus or imagined themselves pursuing a career in the arts. We encourage all eligible Year 10 students to consider attending one of these fantastic opportunities.

24th July, 10:00-14:30 – UCA Farnham – Fine Art, Graphic Design, Animation, Acting

25th July, 10:00-14:30 – UCA Epsom – Textiles and Creative Business

Successful applicants will also be entered into a prize draw to win an artist’s pack!

If you are a student, parent, or teacher interested in learning more, please don’t hesitate to get in touch at outreach@uca.ac.uk.

Ewell's Nescot student's work selected for Origins Creatives 2025

17 September 2025

Art & Design student from Nescot College, Imaani Zafar, has been selected to exhibit her work at Origins Creatives, taking place at the Mall Galleries in July.

Imaani's submission, titled, 'Mother Nature: The Voice of Amazigh Women Through Textile', explores the idea of civilisation and caught the attention of UAL (University of the Arts London) Awarding Body's curator, Calum Hall, amongst over 600 submissions.

Speaking about her work, Imaani, who has completed the first year of her UAL Level Three Extended Diploma said, "I made this installation to educate people about the Amazigh women. Their knowledge and practices are often overlooked, and I wanted to create something to honour their existence."

Sarah Morgan, Art and Digital Design lecturer at Nescot commented, "We are all so proud of Imaani. Her creation demonstrates her artistic voice with meaning and sentiment. We are thrilled that her work has been selected by UAL Awarding Body for Origins Creatives at the prestigious Mall Galleries. It is a fantastic opportunity for Imaani to showcase her work at this annual celebration of student achievement, connect with peers, industry experts and the public."

Origins Creatives is a free exhibition presented by UAL Awarding Body, offering an exciting opportunity for art enthusiasts, critics, and industry professionals in the creative sector to discover fresh, original talent. This event celebrates the dedication and hard work of young creatives from across the UK and internationally. Origins Creatives provides a platform for emerging talent to be seen and celebrated, connecting them with potential collaborators, industry leaders, and a wider audience.

The exhibition features outstanding work from students based across the UAL centres showcasing their talent across the UAL subject areas of Art and Design, Fashion Business and Retail, Creative Media, Music Performance and Production, Performing Arts, Entry Level 3 in Art and Design and Performing Arts, Professional Diplomas, and the Extended Project Qualification.

This year's edition of Origins Creatives will take place in person at the Mall Galleries in central London. The exhibition kicks off with an invite-only opening night on Tuesday 15 July. It will be open to the public from 16 - 19 July, alongside an online showcase.

The exhibition will showcase selected work created by students from Entry Level and Levels 1, 2, 3 and 4 across all subject areas. You can expect to see a diverse range of painting, photography, drawing, sculpture, fashion and more.

Exhibition opening times for the public:

- Wednesday 16 July, 10am - 6pm
- Thursday 17 July, 1pm - 6pm
- Friday 18 July, 10am - 6pm
- Saturday 19 July, 10am - 5pm

Address: Mall Galleries, The Mall, St. James's, London SW1Y 5AS

If you are interested in attending this event, please book your ticket at: <https://www.eventbrite.co.uk/e/origins-creatives-2025-tickets-1345097014379?aff=oddtcreator>

In addition to the range of Art and Digital Design UAL Awarding Body courses, Nescot offers a wide range of college courses for school leavers and adults, including Animal Care, Business, Computing and IT, Construction, Performing Arts, Childcare, Health & Social Care and Beauty Therapy. To find out more about studying at Nescot call 020 8394 3038, visit www.nescot.ac.uk or email adviceteam@nescot.ac.uk

SENDing Pupils to Epsom's Mainstream Schools?

17 September 2025

The national conversation around how best to educate children with special educational needs and disabilities (SEND) has intensified, following proposals by Labour's Stephen Kinnock to increase the number of SEND pupils placed in mainstream schools. The aim, he says, is to promote inclusion and reduce the pressure on stretched specialist placements. But as the Government looks to reshape the SEND landscape — and amid growing concerns about funding — the question for residents of Epsom and Ewell is this: should more children with SEND be placed in local mainstream schools?

The borough is home to a number of schools that already provide dedicated support for pupils with SEND. Epsom and Ewell High School hosts a Hearing Resource Base and also runs an alternative curriculum aimed at meeting the diverse needs of learners. Epsom Primary and Nursery School is one of the local institutions to benefit from Surrey County Council's 2023 expansion of SEND provision. That county-wide investment pledged 6,000 additional specialist school places and introduced 85 new SEND resource base places within mainstream schools, part of a broader £240m commitment to address rising demand across Surrey.

The local impact of that investment is still unfolding. While there has been clear progress in infrastructure and placement availability, there is no publicly available data to confirm whether Epsom's schools currently have the capacity to take in significantly more SEND pupils — or how those decisions might affect classroom dynamics and resource allocation.

However, concern is growing that national policy may now be moving in the opposite direction. In June 2025, reports emerged suggesting that the Treasury is pressuring the Department for Education to identify "efficiency savings" in SEND budgets, amid wider efforts to reduce public spending. According to coverage in *Schools Week* and *The Guardian*, Government ministers have privately discussed potential curbs on local authority SEND funding, with one official describing existing growth in education, health and care plan (EHCP) numbers as "unsustainable." While no official announcement has been made, campaigners fear that this signals a shift towards cost-saving measures that could restrict access to specialist support or delay assessments.

This emerging tension between inclusion and austerity has alarmed SEND advocacy groups. They warn that increasing mainstream placements without matching increases in funding and staff training could place significant strain on already overstretched schools — and risk setting up both SEND and non-SEND pupils for failure.

Supporters of the mainstreaming model argue that it fosters an inclusive environment where all children can thrive together. They point to the benefits of breaking down stigma and allowing pupils with SEND to learn alongside peers, provided the right support mechanisms — such as teaching assistants, differentiated learning, and physical accommodations — are in place.

However, the debate is far from one-sided. Some argue that placing more SEND pupils into mainstream classrooms, especially where complex needs or behavioural challenges are involved, can stretch teaching resources and affect the learning environment for all students. There is no conclusive local data for Epsom, but nationally, parents and advocacy groups have voiced concerns that pupils without SEND may receive less teacher attention or experience disruption in classes that try to cater to a wide range of needs without sufficient staffing or training.

The reality is that the success of inclusion depends heavily on how it is implemented. A mainstream classroom with adequate resources, specialist support, and small group instruction may serve some SEND pupils well. But without those conditions — and without proper funding and planning — the risk is that no one in the classroom gets the education they need.

So far, neither Epsom & Ewell Borough Council nor Surrey County Council has issued a public position on whether more SEND pupils should be placed in mainstream settings, and there has been no formal consultation locally on the implications of national policy changes.

As families, teachers and policymakers await further clarity, it is vital to hear directly from the community. The *Epsom & Ewell Times* invites parents, educators, and students to share their thoughts. Do you believe more children with SEND should be placed in mainstream schools? What has your experience been with local provision — as a parent navigating the system, or a student learning alongside SEND peers?

This is a complex and nuanced issue, and any long-term solution must balance fairness, resources, and outcomes — not just for children with SEND, but for everyone in the classroom. Whatever direction policy takes next, one thing is certain: inclusion is not just about where children are taught, but how.

Epsom SEND case highlights a national problem

Epsom and Ewell Town-Twinning Association presents Cyril Frazer Awards for 2025

17 September 2025

The Epsom and Ewell Town-Twinning Association recently presented its annual Cyril Frazer Awards to this year's winners: Sarah Carpenter of Southfield Primary School, and the joint runners-up, Siobhan Cornell and Jo Johnstone from the French and Music departments at Wallace Fields Junior School, and Olivia Gioffredo from Epsom College.

The prizes were awarded at the Twinning Association's AGM held at Epsom Town Hall on 24 June, by the Mayor of Epsom and Ewell, and Honorary President of the Association, Cllr Robert Leach.

Sarah Carpenter, who was unfortunately not able to attend due to family illness, will receive a grant of £500 to help support French visits and learning activities planned by Southfield Park School, while the joint runners-up will each receive £250 to support their work in the fields of French education and musical study. Olivia is a talented young composer and performer, who treated the AGM to a rendition in French of one of her own songs.

Epsom and Ewell Town-Twinning Association Secretary, Diana Deavin, said:

"The Association's committee was extremely impressed by the quality of this year's submissions, and in particular by the energy and passion of the teachers at these schools. This is reflected in the fact that this year we decided to make a total award of £1000, double the amount normally presented."

The Cyril Frazer Award was established by the Twinning Association as a memorial to Cyril Frazer, who died in 2016. He was Mayor of Epsom and Ewell when it was first twinned with Chantilly in 1995 and was a founding member of the Association. As well as Twinning, one of his other great passions was singing, and he was a keen member of the Epsom Male Voice Choir.

Both elements of Cyril's life are reflected in the requirements for the award, which is available to individuals and groups within the borough who meet some or all of the following criteria:

- Applicants live or study in the borough
- The award meets a special need, such as mental or physical health
- It benefits young people
- It has cultural or educational value
- It is music or performing-arts related
- It furthers friendships or links with Chantilly
- It supports a key twinning or community event

Are paper bottles the solution asks Surrey Uni

17 September 2025

There are few excuses left for polluting our environment with plastics - and the UK can lead the charge towards a more circular future, say researchers from the University of Surrey. The comments come as the Surrey team get ready to showcase three projects tackling plastic pollution at this week's Royal Society Summer Science Exhibition in London (1-6 July).

Surrey's interactive display will present various themes - from replacing petroleum-based packaging, to capturing microplastics before they enter our rivers and seas, to recycling mixed plastic waste that would otherwise end up in landfill.

One such project is SustaPack - a collaboration aiming to reduce the 1.9 billion plastic bottles produced globally every day by developing next generation paper-based alternatives. Backed by a £1 million EPSRC grant, the project is a partnership between Surrey and sustainable packaging company Pulpex Ltd. It combines AI, thermal imaging and advanced computer modelling to improve production processes, create a new biodegradable lining, reduce energy use, and extend product shelf life - bringing low-carbon, fully recyclable packaging closer to large-scale commercialisation.

Professor Joseph Keddie, Professor of Soft Matter Physics and Royal Society Industry Fellow, said:

"The high carbon footprint of plastic and glass packaging materials demands urgent change. This collaboration is about more than simply replacing plastic - it's about designing sustainable packaging that is truly recyclable, scalable, and with a low carbon footprint. It's a powerful example of how science and industry can join forces to address the urgent challenge of the environmental impacts of plastic."

Another project on display is addressing the recovery of plastic particles from our water systems. Some products such as sunscreens, cosmetics and disposable wipes can release microplastics, with the UK government considering restrictions or bans on certain items to reduce this form of pollution. On average, 50% of microplastics found in the world's wastewater treatment plants are fibres, mainly coming from laundry. If not captured, these tiny plastics can adsorb and carry pollutants circulating in the wastewater plant that are then ingested by marine life and ultimately enter the human food chain.

Surrey engineers are developing advanced membrane filtration technology designed to recover microplastics before treated wastewater is released into rivers and seas. By optimising membrane coatings and filtration conditions, the team is working to reduce clogging and improve long-term efficiency, paving the way for cleaner water and healthier ecosystems.

Professor Judy Lee, Professor in Chemical and Process Engineering, said:

"Microplastics are a serious and growing threat to water quality and human health. These tiny particles are difficult to remove once they're in the environment and can carry harmful pollutants. Our research focuses on practical solutions that can be deployed in wastewater treatment plants to stop these pollutants at the source."

To address the challenge of recycling plastics mixed with other materials, such as carbon fibre composites, engineers at Surrey are working to make the process more viable and commercially attractive. These composites are essential across various industries, including aerospace, transport and construction due to their lightweight, strong and versatile properties, but they are notoriously difficult to recycle.

Surrey's research focuses on developing new manufacturing routes and enhancing the thermal, electrical and mechanical properties of recycled carbon fibre, making second-life applications practical and commercially appealing. Reducing waste and using reclaimed materials also help to lower the demand for raw resources.

Dr Iman Mohagheghian, Associate Professor (Reader) in Mechanics of Materials at the University of Surrey, and EPSRC researcher in residence fellow of the National Composites Centre, said:

"Our goal is to make recycled composites a reliable, high-value option for industry. Enhancing their performance and reducing manufacturing waste is an important step towards building a truly circular economy for advanced plastics, supporting the wider journey towards net zero."

At the Royal Society Summer Science Exhibition, visitors can discover Plastic Alchemy - an outreach theme led by the University of Surrey's Circular Economy Group and Fellows from the Institute for Sustainability.

Epsom and Ewell parents taking on the child

smartphone challenge

17 September 2025

Local parents are joining a national movement to delay children’s exposure to smartphones, with a sold-out event next week highlighting local concerns.

Epsom & Ewell’s Smartphone Free Childhood (SFC) group is hosting *The Hidden Impact of Smartphones on our Children* on Wednesday 3 July, 7.30–9pm, at St Martin’s Junior School on Ashley Road. The event will feature contributions from local headteachers, youth speakers, and safeguarding experts.

The movement, which has already attracted nearly 150,000 signatories to its “Parent Pact” across the UK, encourages families to hold off giving children smartphones before age 14. Surrey parents have been among the strongest supporters of the initiative, which aims to reduce the mental health and online safety risks faced by children in a hyper-connected world.

Laura Baker, from Epsom & Ewell’s SFC group, said:

“It’s all about strength in numbers — if your child knows that other kids in their class won’t be getting a smartphone for a few years either, the peer pressure instantly dissolves.”

The event’s speaker line-up includes:

- Mrs Donna Dove, Health and Wellbeing Lead and teacher at St Martin’s, Epsom
- Mr Joe Hordley, Assistant Headteacher at St Andrew’s, Leatherhead
- Mrs Rachel Hall, Associate Headteacher at Glyn School
- Health Professionals for Safer Screens
- Advisors from the Lucy Faithfull Foundation, addressing online safety and child protection
- Young people aged 13, 18, and 24 sharing personal perspectives on growing up in a digital age

Local MP Helen Maguire is expected to attend, and educators from more than ten primary and secondary schools across Epsom and Ewell are anticipated, reflecting the growing concern among school communities.

The organisers say school policies on smartphone use vary widely across Surrey, as staff attempt to manage the impacts of cyberbullying, mental health pressures, misogyny, and distraction in class.

Parents behind the initiative argue that urgent action is needed to protect children’s wellbeing, rather than waiting for government regulation of Big Tech. The cultural conversation around children and screens has been driven by hard-hitting documentaries such as *Swiped* and dramas like *Adolescence*, adding momentum to calls for change.

Epsom & Ewell SFC hope the borough could follow in the footsteps of St Albans, Bromley, and Southwark in developing a “smartphone free childhood” community.

The event is free to attend, but places must be booked in advance. After an initial sell-out, a limited number of extra tickets have now been released.
