

Community urged to help restore nature in Surrey

20 July 2024

Surrey County Council is seeking support from residents, businesses and community groups to help shape a new 'Local Nature Recovery Strategy' (LNRS).

Developed with partners, the strategy will set out a roadmap for the restoration and enhancement of Surrey's natural environment, ensuring that it is sustainable now and for future generations.

Marisa Heath, Cabinet Member for Environment at Surrey County Council said, "We are at a crucial, formative stage of a plan that we hope will create an environment where wildlife can truly thrive in Surrey.

"To ensure that everyone embraces the LNRS and to maintain momentum in taking action to help nature, we want to make sure that as many people as possible are involved right from the start. That's why we encourage and welcome insight and opinion on what people want from their natural environment. Whether it's more flower rich grasslands buzzing with life, or a new woodland on your doorstep that will provide future generations with dappled shade and homes for our precious wildlife.

"A healthy natural environment provides us with so many undervalued benefits from clean breathable air to protection from the worst effects of climate change such as flooding or drought. Please do get involved and help us shape this vital plan."

Residents are encouraged to have their say by completing the **online survey** or by attending the in-person 'Surrey Nature Day' event on 28 September 2024. Held at West Horsley Place, the free, family celebration of nature in Surrey will feature performances of an original play, *Wild Walks* - produced, directed and performed by Guildford Shakespeare Company. More information and booking can be found on the **online survey page**. Other events will also be advertised here.

Surrey is one of 48 local authorities nationwide given responsibility for this work by DEFRA, addressing the current nature crisis in England, funded by UK Government.

For more information, see **Have Your Say Today - Local Nature Recovery Strategy - Commonplace**.

Wet weather kicks into the long grass

20 July 2024

People fed up with long unsightly overgrown grass and verges can use an interactive map to see when their favourite spots are next due to be cut.

The seemingly endless rainfall this year has heavily affected work across the county as the wet weather shuts down the process - Surrey County Council says this is because its machinery will not cut wet grass properly and can, in some cases, even damage the turf.

Urban areas are due to have six cuts a year by the county - unless they have been designated as a blue heart zone. Rural cuts and high speed roads are chopped twice a year.

Blue hearts are part of Surrey's 3,000 miles of grass verges but have been deliberately left to grow as a way of increasing plant and insect biodiversity.

Reducing the amount of times these areas are cut is intended to allow native plant species to thrive - or even to sow native wildflower seeds.

As well as using the map, the county council has published a table covering each area in Surrey and when it estimates to get on with the job.

The council's website reads: "We are experiencing some delays with our planned grass cutting programme dates in parts of the county as a result of the weather and operational issues.

"We are working with our contractors to improve the situation and are sorry for any inconvenience. Thank you for your patience."

The Blue Campaign, founded in 2014 by wildlife filmmaker Fergus Beeley in response to dramatic declining biodiversity in the UK, lets nature take a bit more control, the county council said.

It encourages the rewilding of green spaces in suitable areas and are marked in blue on the map.

Often they can be identified with a blue heart planted in the ground to show residents grass and flowers are deliberately being left to grow – and the council is encouraging residents to identify new sites and gather local support.

Any areas put forward for blue hearts will be reviewed by the county council and, if approved, contractors told to skip the verge unless some safety work is needed.

All verges, including blue hearts are supposed to have a full cut each autumn.

Surrey County Council spokesperson said: “Our new interactive grass cutting map available here shows residents when their area is due to be cut.

“Our grass cutting programme can however be heavily affected by weather. We cannot cut when it is raining heavily or shortly after as the machinery will not cut the wet grass properly and risks damaging the grass itself.

“Weather and ground conditions permitting, urban spaces are cut six times a year and for rural areas, this takes place twice a year.”

Cleanliness is next to Godliness

20 July 2024

On Sunday, June 9th, around 30 volunteers from ASEZ WAO UK, a local young adult volunteer group inspired by the World Mission Society Church of God in Epsom, gathered to clean along the stream at Longmead Road. The event, joined by Howard Gregory, Chairman of the Epsom & Ewell Tree Advisory Board, aimed to prevent plastic pollution in local waterways.

This litter pick was part of the group's Blue Ocean campaign, which strives to reduce pollution in streams, rivers, beaches, and seas. In just two hours, the volunteers collected a total of 37 bags of litter, removing mainly plastics to prevent them from entering the waterways. Passersby at Longmead Road were pleased and cheered the volunteers, expressing their gratitude.

ASEZ WAO UK conducts cleanups like this almost monthly, fostering a positive mindset and a sense of community.

The World Mission Society Church of God, located on East Street in Epsom, is a global church with over 7,500 branches and approximately 3.5 million members. The church teaches about God the Father and God the Mother through the Bible.

The group remains committed to keeping the waterways in Surrey plastic-free.

First school art works for Surrey's trees

20 July 2024

An exciting competition kicked off across Surrey on the 1st June to encourage young people to celebrate ancient trees and have their artwork featured in a new children's book, 'The Thousand Year Tree'. Children aged between 4 and 11 years are encouraged to head to their local Surrey library to pick up a template and create artwork for the inside covers, known as 'end papers' of the new book. Any art medium can be used, and artwork should be themed around trees and nature.

As England's most wooded county, Surrey is home to some of our nation's oldest trees, many are over one thousand years old. To celebrate these trees, local author Lucy Reynolds and illustrator Katie Hickey, are working with a group of children from Weyfield Primary Academy in Guildford. They have already been involved in a series of creative workshops, school assemblies and educational visits to Newlands Corner in the Surrey Hills National Landscape, to see the ancient yew trees. The children, guided by the experts will create poems and timelines charting the history of ancient trees which will culminate in the creation of a captivating Children's Book. The book will be distributed across all 52 of Surrey's libraries as well as through additional local schools, inviting readers of all ages to learn about ancient trees and how to safeguard their future.

Gordon Jackson, Chairman of the Surrey Hills Society said: *"The Surrey Hills Society is delighted to be involved in this project, supported by a grant from the Surrey Hills Access for All fund. We are extremely grateful for the promotional support of the Surrey Library network. Being a part of the process of creating the book with both Lucy and Katie is inspirational and we very much look forward to seeing the final literary masterpiece. The Society is committed to encouraging people of all ages and abilities to discover and enjoy the Surrey Hills and we are proud to help Surrey's children learn so much about our ancient trees and surrounding countryside."*

Carolyn McKenzie, Director of Environment at Surrey County Council said: *"With creativity, education, and community spirit at its core, this project not only celebrates Surrey's ancient trees but also fosters a deeper connection between young minds and the natural world, paving the way for a future generation of environmental stewards. This project highlights even more the importance of Surrey's tree planting scheme, which will plant 1.2 million trees by 2030, the trees of today will become the ancient trees of the future leaving a lasting legacy."*

Susan Wills MBE Assistant Director Arts, Culture, Heritage and Libraries at Surrey County Council said: “What a wonderful opportunity for children to take part in a creative reading project that encourages learning about nature and Surrey’s ancient trees. Surrey is England’s most wooded county and this project is a wonderful opportunity to educate children in the vital role trees play, from providing habitats for wildlife to absorbing carbon dioxide! All fifty-two of our Surrey Libraries are taking part so wish all the participants the best of luck!”.

The competition runs from 1 June to 4 September and templates can be collected and returned to any Surrey Library. Further details and terms and conditions are available on the Surrey Hills Society website, [click here](#) to find out how you can get involved..

The project is a collaborative effort between the Surrey Hills Society, Surrey Hills National Landscape, Surrey County Council, author Lucy Reynolds, illustrator Katie Hickey, Guildford Book Festival and The Old Dungate Press. With thanks to funding from the Surrey Hills Access for All fund, enabling everyone to love and protect Surrey’s National Landscape.

County lines of trees

20 July 2024

Surrey County Council has worked with residents and community groups to plant over 36,000 new trees across the county. The council remains on track to plant 1.2 million trees by 2030, marking one for every resident.

Since the launch of the initiative in 2019, over 510,744 trees have now been planted across the county. This year, 1952 metres of new hedgerows have been planted during this year’s tree planting season, offering habitats for wildlife.

A range of community projects have also been undertaken to support our ambitions to improve air quality and biodiversity. These include:

- A group of 180 community members came together to plant over 7300 hedgerow trees at Bocketts Farm to support birds, mammals and other wildlife.
- 42 trees were donated to Bronzefield Women’s Prison in Ashford and the tree Planting and Establishment team delivered a workshop to those women who were undertaking horticultural qualifications.
- 2625 native broadleaf trees were planted in The Priory C of E School in Dorking using an experimental planting technique, Miyawaki/Tiny Forest. This technique of dense tree planting restores naturally occurring native species and speeds up natural ecological succession.

The new webpages have also been developed to include an interactive tree map, tree planting advice and tips for how residents can get involved. More details are available [here](#).

Marisa Heath, Surrey County Council Cabinet Member for the Environment, said, “I’m delighted that we are progressing our ambition to plant 1.2 million new trees in Surrey as we work to both meet net zero targets but also make our county as green and beautiful as possible.

“This is not something we can deliver alone and we will continue to work with our partners and communities to achieve this target. I encourage residents to visit our new **webpages** to find out how they can get involved.”

Should Nonsuch Park go to the dogs?

20 July 2024

Epsom & Ewell Borough Council will launch a six-week consultation on commercial dog walking in Nonsuch Park from Monday 29 April.

The consultation was commissioned by Nonsuch Park Joint Management Committee following concerns raised by visitors about the increase in dog walkers with multiple dogs in the park.

Ahead of implementing any measures to control commercial dog walking, the Committee is keen to consult with the public and stakeholders about this issue to help inform any future decisions.

Officers from Epsom & Ewell Borough Council will also be at Nonsuch Park on the following dates and times to answer any questions the public may have:

- 29/04/2024 - Cheam Gate, 8:30am-10:30am
- 15/05/2024 - London Road Gate, 10:30am-12:30pm
- 22/05/2024 - Sparrow Farm Road Gate, 12:30pm-2:30pm.

Councillor **Julian Freeman**, (Lib Dem College) Chair of the Nonsuch Park Joint Management Committee, said: "We are aware that Nonsuch Park is hugely popular with dog walkers and while most dog walkers are responsible, concerns have been raised about the growth of commercial walkers with multiple dogs.

"It is important that as many people as possible engage with the consultation, so the Committee can understand park visitors' thoughts, concerns and suggestions about dog control and commercial dog walking. Their input will help us make informed decisions that balance the needs of both dog walkers and the broader park community."

The consultation survey is available on the Epsom & Ewell consultations webpage - Consultations | Epsom and Ewell Borough Council (epsom-ewell.gov.uk).

The survey will close on 3 June 2023.

Nonsuch Park is managed and maintained by a Joint Management Committee, comprising an equal number of Councillors from Epsom and Ewell Borough Council and the London Borough of Sutton. The committee Chair rotates between the two councils annually. The two councils fund, on an equal basis, the running of the park, after taking income into account. The committee is covered by the political balance arrangements.

Ewell's wetlands to be celebrated on an open day

20 July 2024

The South East Rivers Trust (SERT) is inviting local residents to come and celebrate the newly-created **Chamber Mead** wetlands with a day of family fun, activities and guided tours.

The celebration day on Saturday 20th April will give nature lovers the chance to add plants to this critical pollution buster for the **River Hogsmill**, a precious chalk stream.

Families will also have the chance to learn about the health of the river by taking part in riverfly demonstrations, a scavenger hunt and nature craft activities. Guided tours of the wetlands will also be part of the day, which runs from 11am to 3pm.

The open day begins a fortnight of planting opportunities for schools and community groups. All the plants have been specially selected to absorb pollutants and attract pollinators and an increased range of wildlife across the **Hogsmill Local Nature Reserve**.

The wetlands in **Ewell** now divert urban pollutants from the Green Lanes Stream away from the Hogsmill, one of only 200 chalk streams in the world. Once filtered water is fed back into the river just downstream of the famous Stepping Stones, another 5km of waterway is protected as it flows

into south London all the way to the Thames.

Dr Bella Davies, Co-CEO of SERT, said: “We’re thrilled to be giving the community the chance to learn all about Chamber Mead wetlands and crucially give people the chance to complete the project. The public have been very supportive of the wetlands from the start and adding plants is a wonderful opportunity to attract new wildlife not only to the water but the wider nature reserve. This will fulfill the potential of the wetlands to become another jewel in the crown of the reserve and make it an even bigger asset for the community. We’re excited to see the results in years to come on the Hogsmill, which should be a haven for brown trout, water voles and native crayfish, among other species which need our help in recovering their numbers.”

Councillor **John Beckett**, (RA Auriol) Chair of the Environment Committee at **Epsom & Ewell Borough Council**, said: “We are overjoyed to be able to join SERT on the Chamber Mead Wetlands Open Day, to celebrate the fantastic work that has been done here to boost biodiversity and reduce pollution in the Hogsmill River. I hope that residents will join us to help complete the project, which will ensure the Hogsmill River Local Nature Reserve is a place where wildlife and nature can thrive, and one that we can enjoy for many years to come.”

Supported by the Hogsmill Catchment Partnership, the project has received funding from The Coca-Cola Foundation, Natural England (through the Species Recovery Programme), the Environment Agency, Surrey County Council, the Rivers Trust, the Zoological Society of London, Garfield Weston Foundation and Thames Water, with in-kind support from the landowner Epsom & Ewell Borough Council. The new wetlands are part of the wider Replenish programme in partnership with the Coca-Cola Foundation and the Rivers Trust. The aim of Replenish is to restore millions of litres of water in this and other local catchments, in turn improving biodiversity.

Speeches will take place at 11:30am- 12noon:

These will be delivered by **Jackie King**, Chief Executive of Epsom & Ewell Borough Council, Dr Bella Davies, Co-CEO of the South East Rivers Trust, and Borough Mayor Cllr **Robert Geleit** (Labour Court) who will also cut the ribbon to officially open the wetlands.

Plants such as yellow flag iris have been chosen for their ability to take up nutrients such as nitrogen and phosphorous. Meanwhile ragged robin and purple loosestrife will attract species such as butterflies, bees and damselfies, while brooklime, typical in chalk stream settings, will offer shelter for tadpoles and sticklebacks.

Chalking up a victory for the Hogsmill

“Garden of Eden” coming to West Ewell as Wetlands Plan is approved. Will this stop pollution?

Voles let loose on the Hogsmill

About the South East Rivers Trust:

The South East Rivers Trust is an environmental charity bringing rivers and their catchments back to life. Working in 12 river catchments across the South East, the Trust connects communities and mobilises citizen scientists to educate and engage people on the importance of rivers, and supports and challenges stakeholders, businesses and individuals to protect them. The Trust uses data and evidence to target positive action and works with nature to make rivers healthy again. This includes tackling water pollution, addressing water scarcity, reconnecting rivers and restoring habitats.

Tree felling foul of the law

20 July 2024

The culprits who illegally chopped down more than 100 protected trees and damaged seven others have been fined nearly £20,000, Woking Borough Council said.

A landowner, together with its contractor were prosecuted and fined for the unauthorised felling of the trees near Upshot Lane, Pyrford, after pleading guilty at Guildford Magistrates’ Court.

Burhill Development Ltd admitted it ignored a tree preservation order on its land and was made to pay £15,140,

comprising fines of £11,000, a victim surcharge of £2,000 and costs of £2,140.

Their contractor, P&A Services, which carried out the work, also pleaded guilty to the unauthorised felling and causing damage to the protected trees and was ordered to pay a total of £2,900; fines of £1,000; a victim surcharge of £400; and council costs of £1,500.

The action was taken against the two firms by Woking Borough Council. The original hearing took place in October 2023 with the judge issuing sentence in March 2024.

Speaking about the prosecution, Beverley Kuchar, Woking Borough Council's strategic director for place, described it as an "important case" and welcomed the decision.

She said: "Whether you permit or cause wilful damage to our environment we will take legal action wherever necessary.

"It is important that landowners and their contractors take the necessary steps to understand what consent is required before commencing tree works.

"The status of the borough's trees can be checked quickly and simply online. If in doubt, our arboricultural team can provide advice in advance of any works commencing.

"There is no excuse and, as in this case, failure to do so can lead to a criminal prosecution and significant fines."

Tree Preservation Orders protect specific trees, groups of trees, or woodland that benefit the wider community

Chalking up a victory for the Hogsmill

20 July 2024

The **South East Rivers Trust** (SERT) has completed the construction of a 2,000m² pollution filter which will bring major benefits to Epsom and Ewell's **Hogsmill** chalk stream.

When planting takes place in the spring, the newly constructed Chamber Mead wetland will protect and improve 5km of river downstream, filtering pollutants and becoming a haven for wildlife.

The project has been carried out in partnership with **Epsom & Ewell Borough Council**, which owns and manages the **Hogsmill Local Nature Reserve**, a popular greenspace which will now benefit from this new community asset.

The wetland is a crucial project for the Hogsmill, which suffers adversely from pollution such as urban road runoff, raw sewage discharges and misconnected plumbing that sends drain water directly into the river. Water from the Green Lanes Stream has been diverted through a sediment trap and two wetlands, with filtered, cleaner water reconnected to the Hogsmill downstream of the famous Stepping Stones.

News about the wetland's completion comes in the week of **World Wetlands Day**, on Friday 2nd February. Dr **Bella Davies**, Co-CEO of SERT, said: "We are delighted that the construction phase of this important wetlands project has now been completed. It is destined to become a jewel in the crown of the Hogsmill Local Nature Reserve. The public has shown great enthusiasm for this project, and we will soon be calling on volunteers and community groups to add the plants that will really make the wetlands flourish as a magnet for wildlife. The water quality improvements that will result from the wetlands are designed to help the river become a healthier place for all, especially wildlife that thrive in a chalk stream, such as brown trout."

Councillor **John Beckett**, (RA Auriol) Chair of the Environment Committee at Epsom & Ewell Borough Council, said: "The council is committed to protecting and enhancing biodiversity in our borough, as per our Biodiversity Action Plan 2020-30. This partnership project with the South East Rivers Trust will help to ensure that the Hogsmill Local Nature Reserve is a place where nature can thrive; from woodpeckers, hedgehogs and bats - to species whose numbers have dwindled such as water voles, fish and eels. We know our residents cherish this Local Nature Reserve and I hope that many can join the community planting days, which are a unique opportunity to be part of this fantastic project."

SERT is now preparing a series of community planting days, to take place in the Spring. These will give residents the chance to plant the vegetation to help the wetlands counter pollutants.

Schools, community groups and residents will be given opportunities to install plants that have been specifically selected to filter pollution, trap sediments and attract a variety of wildlife. Plants selected include yellow flag iris, ragged robin, purple loosestrife and brooklime.

In time, SERT will also offer guided walks and outdoor education sessions for school children. A nature trail is planned for families to interact with the wetlands as they develop, alongside information boards which will detail the reasons why the wetlands were needed and the types of wildlife that should be attracted.

Supported by the Hogsmill Catchment Partnership, the project has received funding from The Coca-Cola Foundation, Natural England (through the Species Recovery Programme), the Environment Agency, Surrey County Council, the Rivers

Trust, the Zoological Society of London, Garfield Weston Foundation and Thames Water, with in-kind support from the landowner Epsom & Ewell Borough Council. The new wetlands are part of the wider Replenish programme in partnership with the Coca-Cola Foundation and the Rivers Trust. The aim of Replenish is to restore millions of litres of water in this and other local catchments, in turn improving biodiversity.

The construction of the wetland is expected to cost £1 million. We are proud to have a good mix of funding for this project, including private funding from Coca Cola, Thames Water and charitable grants, as well as public funding from the Environment Agency, Natural England and Surrey County Council.

It is estimated there are 200 chalk streams across the world, with about 160 of them in England, mostly in the south.

Grate find in Epsom’s Millennium Green

20 July 2024

The Woodcote Millennium Green is unique in Surrey. It comprises of an area of 7 acres, bounded by Woodcote Green Road to the north and the Woodcote Estate to the south and is located at the rear of Epsom General Hospital.

The land forming The Woodcote Millennium Green has passed through the ownership of monks, lords and developers over the last thousand years and now flourishes under the stewardship of a Trust whose members are passionate to retain the character of this landscape gem.

The land was originally part of the estate of the Manor of Horton, owned by Chertsey Abbey until the dissolution of the lesser monasteries in 1536-7. After passing through several owners, the Manor passed to the sister-in-law of John Evelyn, the 17th Century diarist. Woodcote House was re-built at this period, on a site which is now just south of the Millennium Green.

Woodcote House was acquired by Sir Edward Northey (1652-1723) in the late 17th Century and became the family seat to the Northey family for 250 years. The present house dates mainly from the early 19th Century. Photographs of the area show an open wooded landscape with cattle grazing by the pond. The pond is shown on the earliest Ordnance Survey maps of Epsom and surroundings and must pre-date the mid 19th Century.

In the late 1930s, Woodcote House and the surrounding land was sold to Earnest Harwood, whose building company developed most of the land for housing, forming The Woodcote Estate. Woodcote House itself was subdivided into flats and has undergone a major refurbishment.

In 1999, the Harwood family donated a large portion of the remaining woodland including the pond to be held in perpetuity by the Trustees of The Woodcote Millennium Green Trust. The Mayor of Epsom and Ewell officially opened The Woodcote Millennium Green in July 2000.

Whilst The Millennium Green was once a 7-acre site of overgrown brambles, it has been transformed by residents and volunteers into the attractive piece of managed natural woodland that it is today.

It was during one of my own walks through the woodland that I discovered a cast iron fire grate close to the rear of Woodcote House that had been unearthed by tree roots. Having obtained permission from one of the trustees of The Millennium Green to remove the fire grate, I contacted Bourne Hall Museum in Ewell and was later informed by one of the curator’s contacts that the cast iron fire grate is likely to date to the 19th Century and was probably used inside a room of Woodcote House prior to being replaced and buried in the ground at the back of the building.

Four times a year The Woodcote Millennium Green Trust holds maintenance days to help with the upkeep of the green which can be found at the rear of Epsom General Hospital.

It is a great community experience open to all ages and abilities so if you would like to get involved, or make a donation to fund maintenance and improvements, please email:

info@woodcotemillenniumgreen.org.uk
