

## Cllr Dallen accused of £1/2 m Epsom & Ewell Council cover-up

14 January 2026

BBC LDRS reports: A Surrey council [Epsom and Ewell] must pay out up to £500,000 after failing to properly check the condition of a major leisure centre before handing it over to a new operator. Poor ventilation, damp and 'possible roof cracks' were cited as some of the problems related to the "fabric" of the building.

Epsom and Ewell Borough Council has agreed to cover the costs of urgent repairs at Rainbow Leisure Centre after the new contractors took over the site and uncovered a long list of issues, some relating to the structure and fabric of the building. Places Leisure took over the contract on October 1, 2025, but has not yet signed on the dotted line, the LDRS understands.

The pay out was approved via a confidential urgent decision, seen by the Local Democracy Reporting Service (LDRS), after Places Leisure said it should not be responsible for fixing the issues.

An urgent decision is when a council cannot wait until the usual decision-making committee process as it could harm the public or council interests.

Some of the problems relate to the fabric of the building, for which the council is responsible, the LDRS understands. This is despite the council previously insisting it had carried out such checks.

In a public report dated June 2025, Epsom and Ewell Borough Council said it had commissioned a stock condition report to make sure the building was handed over in good nick.

As the LDRS understands, council officers believed the centre would be handed back in good condition. An external consultant was used, but their inspection was not invasive, meaning hidden problems may not have been picked up. But just six months later, the authority is now facing a bill of up to £500k to fix problems that either were missed or not properly dealt with because the council did not know about them.

When Places took over, it found issues it believed the previous operator should have fixed. Some of the problems raised include:

- Fire alarm faults
- Lift issues
- Broken seating
- Damaged glazing
- Faulty toilets
- Poor ventilation
- Damp
- Possible roof cracks
- Machinery at "end of life"

Some were flagged as health and safety risks, meaning urgent action was needed to keep the centre safe and open.

The council has now agreed to let Places carry out the repairs and reclaim the costs by reducing the management fee it pays back to the council. Officers said this is the "most cost-effective" option, but it effectively means residents are picking up the tab.

### Why is the council paying?

Under the contract, some repairs fall to the council as landlord responsibilities. Others may be recoverable from former operator GLL, but legal experts warn the council is unlikely to claw back the full amount. GLL has been contacted for comment. [See below for additional reporting.]

The authority plans to dip into its 'dilapidation' reserve, a pot of money set aside for building repairs, to cover the shortfall. Officers admit the final cost is still being worked out, but estimate it could reach up to £500,000.

### Opposition fury

Councillors have slammed the council for not knowing the state of its own properties.

Cllr **Alex Coley**, member of the Independent group (Ruxley), said: "I'd have hoped that the council as landlord would understand the condition of the leisure centre to establish its potential liability."

Labour group leader, Cllr **Kate Chinn**, (Court) hit out at the ruling Residents' Association (RA), calling the situation a "shocking scandal".

She said: "This secrecy wasn't about keeping the costs involved from the parties to the negotiations as they already know them. It was about preventing the public from learning how incompetent the RA are."

She added: "Cllr **Neil Dallen** (RA Town) has rightly owned this fiasco, but without realising that his 'nothing to see' attitude that council tax payers should expect to be routinely stuck with bills on this scale shows how complacent he is with their money."

She accused the ruling group of being distracted: "The RA have clearly taken their eye off the ball as they focus on a self-serving attempt to create new parish councils and new roles for themselves."

Cllr **James Lawrence**, leader of the Liberal Democrat group (College), said the situation shows "the importance of maintaining key properties so they are in good working condition and ensuring the status of our properties is communicated to both councillors and residents in good time."

### Council response

Council leaders defended the decision, saying negotiations are normal during handovers. Councillors Neil Dallen and **Clive Woodbridge** (RA Ewell Village) said: "Rainbow Leisure Centre transferred to a new operator, Places Leisure, on 1 October 2025. Since then, we've been pleased to see a number of improvements at the centre.

"This marks the beginning of an exciting new chapter for the leisure centre... including significant investment to upgrade the gym, studios, swimming changing rooms and more, which are already underway."

They added: "With any handover, it is normal practice for there to be negotiations around works to be carried out which form part of the contract finalisation."

However, they refused to release further information, saying: "Details relating to terms and financial arrangements are commercially sensitive and therefore not in the public domain."

### Places Leisure

A spokesperson said: "Places Leisure took over the operation and management of Rainbow Leisure Centre in partnership with Epsom and Ewell Borough Council on 1st October 2025. We are excited to work closely with the Council to implement changes and significant investment at the centre to make a positive impact for the local community."

Emily Dalton LDRS - the BBC's Local Democracy Reporting Service

#### Additional reporting from Epsom and Ewell Times:

In a further twist GLL has supplied Epsom and Ewell Times a response to the issues: *“GLL was proud to partner with Epsom and Ewell Council on the design and opening of Rainbow Leisure Centre over 20 years ago. This innovative and award-winning centre has been extremely successful over the 20 years of GLL’s tenure, engaging millions of local residents in activity, improving their health and wellbeing.*

*“GLL is unaware of any legal claim that the Council is looking to bring in relation to the standard of the building on handover, especially as there are set protocols to deal with building handovers prior to any instigation of legal action. As background, the Council undertook, via specialist contractors, a full survey of the building prior to GLL exiting. As is normal in all leisure transfers, items that were identified for [repair or rectification] in that survey for GLL were all completed prior to handover and signed off by the specialist contractors on behalf of the Council. GLL handed the building over to the standard required by the Council and under the contract.”*

It is normal practice for Councils as landlords to have rights of periodic entry and inspection of premises it engages contractors to manage. Either the Council was negligent in failing to insert such rights in the contract with GLL or the Council has been negligent over an extended period of years in failing to carry out inspections or to carry out inspections properly.

The Council has made fully public announcements that Places commenced its contract on 1st October 2025. See Epsom and Ewell Times report: Epsom’s Rainbow Leisure Centre Places new operators. The Information Commissioner has made plain that Council’s cannot evade accountability by claims of ongoing contractual negotiations. The tender process having ended for both GLL and Places means there is little if any financially sensitive information to protect justifying a confidential label on information that exposes probable Council incompetence.

Epsom and Ewell Times asked Epsom and Ewell Borough Council a series of questions about these issues and received the same “nothing to see here” response from Cllr Dallen as obtained by the BBC’s Local Democracy Reporting Service (LDRS) reporter Emily Dalton, as above. The Epsom and Ewell Times has thus submitted to Epsom and Ewell Borough Council formal Freedom of Information Act demands for relevant information.

## From the Cosmos to Commerce: University of Surrey Leads the Way

14 January 2026

The University of Surrey has been showcasing a remarkable breadth of achievement in recent weeks, with major advances announced across fundamental science, international collaboration, digital trade policy and lifetime academic excellence.

From unlocking the origins of the universe’s rarest elements, to shaping the future of UK trade infrastructure and celebrating world-leading research careers, the University’s latest announcements underline its growing national and international impact.

#### Unlocking the universe’s rarest elements

Surrey scientists are leading a new £215,100 international research project that aims to transform understanding of how chemical elements are formed during extreme cosmic events such as supernovae, neutron-star collisions and X-ray bursts.

Funded by the Royal Society’s International Science Partnership Fund, the three-year project brings together researchers from Surrey, Kyushu University and Japan’s world-leading RIKEN laboratory. The team will develop and deploy cutting-edge instruments capable of measuring some of the rarest and most unstable atomic nuclei ever studied.

These exotic isotopes do not exist naturally on Earth and can only be created briefly in advanced physics laboratories. By measuring their mass and decay rates for the first time, researchers hope to refine theoretical models of nuclear structure and gain new insight into how the heaviest elements in the universe are formed.

Experiments will take place at RIKEN’s Rare-Radioactive Isotope Ring, a unique facility that allows repeated observation of these short-lived nuclei. Surrey researchers will play a central role, leading the design and testing of advanced detector and data-acquisition systems in the UK ahead of the experimental programme in Japan.

The collaboration is also expected to strengthen scientific ties between the UK and Japan and reinforce the UK’s position at the forefront of nuclear physics research.

#### Warning over UK digital trade and border fragmentation

In a very different field, new research from Surrey Business School and the Centre for the Decentralised Digital Economy has issued a stark warning that the UK risks falling behind global competitors in digital trade unless urgent action is taken.

The study argues that the UK’s digital border initiatives are fragmented, with no single organisation responsible for coordinating legislation, technology platforms and end-to-end border processes. As a result, businesses face repeated data requests, delays and uncertainty, increasing costs rather than reducing friction.

Researchers examined UK trade and border policies since 2017, including the 2025 UK Border Strategy, recent digital trade legislation and multiple government pilot projects. Drawing on international case studies and academic research, the team proposes a collaborative governance framework to guide reform.

The report calls for the government to give one body a clear mandate to orchestrate policy, digital platforms and data standards across departments. It argues that, with the right leadership, the UK has a window of opportunity to create a new digital “silk road” for trade, enabling trusted data sharing that benefits smaller firms as well as multinationals.

## Lifetime achievement recognised in materials science

Surrey's excellence in research was further highlighted by the announcement that Professor Joseph Keddie, Professor of Soft Matter Physics, has been awarded the 2026 Sir Eric Rideal Award for lifetime achievement in colloid and interface science.

Jointly awarded by the Royal Society of Chemistry and the Society of Chemical Industry, the prestigious honour recognises sustained and distinguished contributions to the field. Professor Keddie is internationally known for pioneering work on polymer colloids, sustainable materials and so-called "living materials", with applications ranging from coatings and adhesives to wastewater treatment and bioremediation.

Over a career spanning more than three decades, he has authored more than 150 academic publications, holds multiple patents and co-authored the influential book *Fundamentals of Latex Film Formation*. His work at Surrey has previously been recognised by major awards from both the Institute of Physics and the Royal Society of Chemistry.

Professor Keddie will deliver the Rideal Lecture, titled *More than Watching Paint Dry*, on 8 April 2026, presenting highlights from his research including self-layering coatings and carbon-storing "living paints".

## A university with global reach

Taken together, the announcements paint a picture of a university operating at the cutting edge across disciplines: advancing fundamental science on a global stage, influencing national policy debates, and nurturing research careers with lasting international impact.

For Surrey residents, the achievements reinforce the University of Surrey's role not only as a local institution, but as a centre of innovation and expertise with reach far beyond Guildford.

## Epsom and Ewell lags Surrey's recycling front-runners, new tracker shows

14 January 2026

### Surrey's self-assessment - and what sits behind it

A new "Surrey Waste Tracker" published by the Surrey Environment Partnership (SEP) claims Surrey is one of the best performing areas in England for recycling and low landfill. The tracker uses data for the 2023-24 year and compares Surrey County Council with 28 "similar" waste authorities across England.

SEP reports that 54.5% of Surrey's total household waste is recycled, reused or composted, placing Surrey joint second out of 29 comparable authorities. Surrey households produced around 445kg of rubbish per home, said to be eighth out of 29 and better than an England average of around 511kg. Just 0.2% of Surrey's household waste went to landfill, compared with an England average of 5.5%, and 85% of Surrey's waste is processed in the UK rather than exported.

The tracker does not spell out which 28 other authorities Surrey is being measured against, nor does it cite the exact national datasets used for those comparisons.

### How independent national data stacks up

Provisional government waste statistics for 2023-24 show that, across England as a whole, the household recycling rate is around 44%. The same official release reports that 5.5% of local authority-collected waste in England was sent to landfill.

Taken together, these independent figures broadly support SEP's central message: Surrey's recycling rate is around ten percentage points higher than the England average, Surrey sends a much smaller share of its waste to landfill than the country as a whole, and Surrey households appear to be producing less residual rubbish than the average English household.

However, the 42.3% "England average" recycling figure quoted on the Surrey Waste Tracker is slightly lower than the 44% national rate reported by government, suggesting SEP may be using a different measure or earlier cut of the same data.

### Where Epsom and Ewell sits in the Surrey league

The tracker also breaks down performance by each of Surrey's 11 district and borough councils, including Epsom and Ewell. For each area it publishes annual rubbish per household (in kg), the proportion of household waste recycled, reused or composted, and the proportion of recycling processed within the UK.

On those measures, **Epsom and Ewell** is a low performer within Surrey, but well behind the best-performing districts.

Recycling rate: Epsom and Ewell recycles, reuses or composts 52.1% of its household waste. This places it ninth out of the 11 Surrey districts and boroughs on the recycling measure, while Surrey Heath leads the county on 58.9%, with Guildford and Tandridge close behind.

Rubbish per household: Epsom and Ewell households produce 402.3kg of rubbish per year. That is better than Elmbridge and Spelthorne, but still ninth out of 11 when ranked from lowest to highest residual waste. Surrey Heath again tops this table with 341.2kg per household.

How much recycling stays in the UK: Only 63.7% of Epsom and Ewell's collected recycling is processed within the UK, the lowest share in Surrey. Several councils send a much higher proportion of recyclables to UK facilities, including Reigate and Banstead, Guildford and Tandridge.

### Surrey district and borough waste league table, 2023-24

Based on the Surrey Waste Tracker's published data, the picture across the 11 local areas is as follows, ranked by recycling rate from highest to lowest:

Rank (recycling)	District / Borough	Rubbish per household (kg)	Proportion recycled / reused / composted (%)	Proportion of recycling processed in UK (%)
1	Surrey Heath	341.2	58.9	76.8
2	Guildford	347.5	57.9	84.6
3	Tandridge	361.5	57.8	84.2
4	Waverley	350.0	57.0	75.3
5	Mole Valley	362.1	56.4	72.2
6	Woking	348.1	56.4	73.1
7	Elmbridge	407.5	54.2	72.6
8	Reigate and Banstead	381.2	54.2	96.2
9	Epsom and Ewell	402.3	52.1	63.7
10	Runnymede	386.4	46.8	71.5
11	Spelthorne	439.3	44.5	70.7

On this reading, Epsom and Ewell recycles a larger share of its waste than the national average, but less than eight of its ten Surrey neighbours, produces more rubbish per household than most Surrey areas, and sends the smallest proportion of its recycling to UK plants.

### Who owns the Surrey Environment Partnership?

The Surrey Waste Tracker is published by the Surrey Environment Partnership, which is a partnership between Surrey County Council and the 11 district and borough councils. SEP is therefore not an external watchdog but a joint project of the councils whose performance it reports on.

The tracker draws on data that councils are legally required to report to central government through the WasteDataFlow system, which the government then uses to produce national statistics. However, it does not identify the 28 "similar areas" Surrey is compared with, nor the criteria for including them, and it does not explicitly reference the government publications from which national averages appear to be taken.

For residents in Epsom and Ewell, the Surrey Waste Tracker offers a useful snapshot of local performance within a strong-performing county, while also raising questions of transparency and comparability. The extent to which the borough can close the gap with Surrey's recycling leaders, and keep more of its recycling treatment within the UK, is likely to remain a live policy issue for years ahead.

Sam Jones - Reporter

Image: Landfill site in UK by M J Richardson CC BY-SA 2.0

Since publication of the above report the Surrey Environmental Partnership has issued the following helpful clarification:

Unfortunately, there was an error in the number of authorities that we compared Surrey with. The report originally listed that there were 29 similar authorities, when in fact it was 27. This has now been amended on our website - Surrey Environment Partnership - Surrey Waste Tracker. The authorities that Surrey compares to are the other waste disposal authorities in England.

The article also mentions a discrepancy between the figure of 42.3% that we used for England's recycling rate compared to the figure of 44.0%. Just to clarify that 44.0% is England's recycling rate for the calendar year of 2023 whereas 42.3% is England's recycling rate for 2023-24, which is the period that our report covers.

Finally, with regard to the source of the data, the source is Defra's publicly available data, which can be found here - Local authority collected waste management - annual results - GOV.UK.

We have made a note to include the above level of detail in Surrey Waste Tracker reports from hereon.

## Epsom Hospital faces flu challenge

14 January 2026

Hospitals serving Epsom and Ewell are facing one of their toughest starts to a year in recent memory, with dozens of beds taken up by flu patients and others closed because of infection control, as winter illnesses surge across the country.

As of Sunday, 45 beds across St George's, Epsom and St Helier hospitals were occupied by patients with influenza, according to the St George's, Epsom and St Helier University Hospitals and Health Group. At the same time, further beds have had to be taken out of use due to flu and norovirus outbreaks, reducing the system's overall capacity just as demand is rising.

The combination of cold weather, widespread winter viruses and a growing number of patients needing specialist treatment has created what NHS leaders locally describe as a "bleak" start to the new year.

Elaine Clancy, Group Chief Nurse for St George's, Epsom and St Helier, said hospitals across the group were seeing "some very sick patients" as winter illnesses and low temperatures take their toll. "Don't make the mistake of thinking flu is just a bad cold," she said. "These figures show the infection can make people seriously ill, and I'd urge people to take steps to ensure they and their loved ones don't suffer."

## A national problem, not just local

The pressure on Epsom and St Helier reflects a wider national trend. NHS England has warned that socialising over Christmas and New Year is likely to have fuelled a rebound in flu, Covid-19 and other winter viruses, with senior figures cautioning that the worst of the season is "far from over".

Across England, hospitals are again reporting high numbers of admissions for respiratory illness, alongside continued demand from people with complex medical needs who are more vulnerable in cold weather. The knock-on effect is felt most sharply in accident and emergency departments, where delays grow when wards are full and patients cannot be moved on.

Public health experts have long warned that flu remains a serious illness, particularly for older people, pregnant women and those with underlying conditions. In bad seasons, it contributes to thousands of excess deaths nationally, even though it is often dismissed as minor.

Norovirus, meanwhile, spreads rapidly in hospitals and care settings, forcing wards or bays to close for deep cleaning, further reducing available beds at precisely the moment they are most needed.

## What people can do

Local NHS leaders are urging residents to take simple but effective steps to reduce the spread of infection and help protect the health service. These include getting vaccinated against flu if eligible, washing hands regularly, staying at home if unwell, and avoiding contact with vulnerable people when displaying symptoms. Keeping homes warm - ideally at 18°C or above in key rooms - and wrapping up when going outdoors also helps reduce the risk of illness.

People are also being asked to use health services appropriately, so that emergency departments remain available for those in urgent need. NHS 111, which is available online and by phone 24 hours a day, can direct people to the right service, while community pharmacists can advise on many minor illnesses and treatments.

Residents are encouraged to check on neighbours, friends and family who may be vulnerable, to make sure they have food, medication and adequate heating during the cold snap.

With flu and winter viruses still circulating widely, health leaders say the coming weeks will be critical — both for hospitals trying to manage demand, and for communities doing their part to keep themselves and others safe.

## Epsom lamppost flags: symbol of pride — or cause of anxiety?

14 January 2026

Across parts of Epsom and Ewell, the appearance of Union Jack flags tied to lampposts has prompted sharply differing reactions. For some residents, the flag remains a symbol of shared identity and national belonging. For others, the manner of their sudden arrival — often without permission and fixed to public infrastructure — has caused unease, sparking wider anxieties about division, ownership of public space, and the meaning of patriotism in modern Britain.

In September 2025 Surrey County Council restated its position on flags and attachments to street furniture, reminding residents that anything fixed to a lamppost or painted on a public highway requires formal consent. The council emphasised safety considerations for drivers, pedestrians and maintenance crews, and said unauthorised attachments may be removed during inspections. Residents wishing to display flags on public land are advised to apply in advance through established procedures. The council was clear, however, that anyone may fly a flag from their own property if they wish to do so.

The debate has not only been technical or regulatory. One local resident, writing to the *Epsom and Ewell Times*, described attempting to remove some of the flags in their neighbourhood and being confronted in the process. Their concern was less about flags as symbols, and more about how — and by whom — they were placed, and whether they were being used to signal exclusion rather than unity. The writer reflected on the way social and political polarisation in recent years has shaped how national imagery is read, and expressed frustration at what they saw as a lack of clarity over which authority is responsible for removing unauthorised items from street furniture.

Others in the borough have reacted very differently, seeing the flags as benign expressions of pride, or as gestures intended to lift spirits at a time of economic and social uncertainty. Some residents have argued that the Union Jack should not be regarded as belonging to any one political tradition, recalling moments when people across the country — including at national sporting events and during major civic occasions — have gathered beneath it without controversy.

That broader question — who "owns" the flag — has recurred throughout modern political history. When crowds waved the Union Jack outside Downing Street on the night of Labour's 1997 election victory, commentators spoke of the centre-left "reclaiming" national symbolism from the political right, attempting to make it inclusive rather than exclusive. Others have suggested that opportunities were later missed to develop a more layered sense of identity, for example by flying the European Union flag alongside the Union Jack on public buildings, as was commonplace in many EU member states. For some, that dual display might have normalised a shared British and European identity; for others it would itself have been contentious. The difficulty of striking a balance illustrates how strongly flags can be read in different ways.

In Epsom and Ewell, the present concerns appear to rest less on the flag itself than on process, tone and consent. The sudden appearance of flags on lampposts — without clear identification of who has installed them and without permission from the asset-owning authority — has left some residents feeling unsettled or excluded, while leaving councils fielding questions about responsibility and enforcement. The practicalities are not trivial: removing items at height may require equipment, contractor time and public money.

One constructive suggestion arising from local discussions is that the right of individuals to fly a flag from their own homes could be matched by a more open and confident approach from civic bodies, schools, churches, voluntary groups and local businesses — flying the Union Jack from their own buildings in clearly identifiable and lawful ways, and on agreed occasions. In that model, the flag becomes visible as a symbol belonging to all, rather than as an anonymous street-level intervention that some interpret as a political statement.

Another proposal is for clearer published guidance from the relevant authorities — setting out who owns which assets, how permission can be sought, what safety

standards apply, and how residents may raise concerns or objections. Transparency about due process may help reduce tension, even where views differ about meaning and symbolism.

What the current debate in Epsom and Ewell perhaps most clearly reveals is that flags still carry emotional weight — capable of reassuring some while unsettling others. Between those positions lies a space for thoughtful discussion about how shared symbols are used in public places, and how a sense of belonging can be fostered without causing anxiety to neighbours who may read them differently.

Sam Jones - Reporter

## Do you have the bottle for these cold nights?

14 January 2026

With the UK in the midst of a bitter cold snap, many of us are reaching for hot water bottles to help keep warm during the day and through the night.

While hot water bottles are an effective and affordable way to keep warm, in 2024 nearly 1,000 people were admitted to burn units in England and Wales following hot water bottle accidents.

Here, the team at Health and Safety training experts High Speed Training share some practical advice on how to use hot water bottles safely.

Dr Richard Anderson, Head of Learning and Development at High Speed Training, said: "Hot water bottles are a fantastic way to beat the chill, and with energy costs remaining a concern, they are more popular than ever. However, like any household item that uses high heat, they aren't without risk."

### Check the age

It is recommended that hot water bottles are replaced every two years. The rubber used in their construction can deteriorate over time, making bottles more likely to split or leak.

You can check when a hot water bottle was made by looking for a flower-shaped symbol, known as a 'daisy wheel', embossed onto the neck or body of the bottle. The number in the centre shows the year of manufacture, while the twelve surrounding segments represent the months of the year. The number of segments with dots indicates the month the bottle was made.

For example, if the symbol has 25 in the middle and dots in the first six segments, the bottle was manufactured in June 2025. If a segment contains more than one dot, the number of dots in the final filled segment shows which week of the month the bottle was produced.

### How to fill and use your hot water bottle safely

Dr Anderson added: "Before filling a hot water bottle, always check it for visible damage or signs of wear and tear. Avoid filling the bottle with boiling water, as this can weaken the internal seams. Allow the water to cool slightly before filling."

"It's also advisable to only fill the bottle to around two-thirds full. Expel any remaining air before tightening the stopper securely."

He also advised always using a cover on a hot water bottle to reduce the risk of contact burns, and never sitting or lying on one, as this increases the likelihood of the bottle failing. "When not in use, empty the bottle completely and store it with the stopper removed in a cool, dry place, such as a cupboard."

## Get That Drain Unblocked in Epsom & Ewell - Trusted Local Drainage Specialists

14 January 2026

Blocked drains are one of the most common and disruptive problems faced by homeowners and businesses in Epsom and Ewell. What often starts as a slow-draining sink or unpleasant smell can quickly turn into an overflowing drain if left untreated. Acting early is usually the best way to prevent further damage and unnecessary costs.

Drainage & Plumbing Ltd is a local drainage company providing professional drain unblocking services across Epsom, Ewell and nearby areas. Working regularly within the community, the team understands the drainage challenges common in the area, particularly in older properties where pipework has been in place for many years.

The company focuses on thorough, long-lasting solutions rather than temporary fixes. Blockages caused by grease, debris or everyday waste are cleared properly using professional equipment, helping restore normal flow and reduce the likelihood of repeat issues. Whether the problem affects a kitchen sink, toilet or external drainage system, work is carried out efficiently and with minimal disruption.

Reliability and transparency are key priorities. The business places strong emphasis on clear communication, punctual attendance and fair pricing. Customers are given honest advice based on the condition of their drains, allowing them to make informed decisions without pressure or unnecessary upselling.

Drainage issues can affect residential homes, rental properties and local businesses throughout Epsom and Ewell. Having access to a dependable local drainage specialist can make a significant difference when problems arise, especially when quick action helps prevent further disruption.

By choosing a local service, residents are also supporting a business that contributes to the local economy and community. The company continues to build its reputation in Epsom & Ewell through repeat customers and word-of-mouth recommendations.

If you are experiencing a drainage problem or would like professional advice, local help is available from a team that understands the area and its infrastructure.

## Epsom and Ewell Council leader message for 2026

14 January 2026

Cllr **Hannah Dalton** (RA Stoneleigh) has outlined Epsom and Ewell Borough Council's goals for 2026 in a New Year message to residents. The leader has promised a smooth transition to the new mega council, East Surrey, and services will still be there for residents.

It has been a busy year for Cllr Dalton with growing financial pressures amid housing demand for those facing homelessness, planning applications on green belt sites and, of course, local government reorganisation and heated debates around parish councils.

The leader wrote:

"2026 will mark the final full year of Epsom & Ewell Borough Council (EEBC) as a local authority. As the one of the longest, independently led councils in England and Wales, that is quite a legacy and landmark.

"As Chair of the Surrey Leaders Group, I have been heavily involved in local government reorganisation (LGR) process since it was announced in December last year. The focus for me in the next 12 months will be around establishing the new East Surrey Unitary Council. As part of this I will be a member of the Joint Committee for LGR in Surrey, and I want to ensure the safe and legal transition of services to the new authority. My focus will also be on EEBC continuing to deliver for our residents and our legacy.

"Elections for the East Surrey Unitary Council in May 2026 will be pivotal, and I urge all Surrey residents to vote when the time comes. It's vital that everyone in our communities is represented, as these elections will decide the make-up of the new Unitary Council that will set the strategy for the next five years.

"EEBC is also currently carrying out its second and final consultation asking residents them whether they want to create two new community councils, Epsom Community Council and Ewell Community Council. Epsom & Ewell is unparished which means that when EEBC is dissolved, there will be no lower tier of local government, and we are asking if residents want new community councils to represent local voices, be a statutory consultee on planning matters, and more.

"Finally, next year I will look to reflect and recognise what EEBC has achieved during the 90 years since it was formed and the vast changes it has seen. It's an honour to lead the council in its final year of Residents' Association administration, and I'm proud to serve our community during this landmark time."

Emily Dalton LDRS

## Mole Valley leaders look to their final year legacy

14 January 2026

We are entering the final full year for councils in Surrey before they are dissolved and merged into mega authorities - and the leaders know time is running out if they wish to fulfil any lasting ambitions. In October this year, the government announced that Surrey would change forever. From the ashes will rise two mega authorities that split the map effectively in two. People living in Waverley, Guildford, Woking, Surrey Heath, Spelthorne and Runnymede will soon be calling West Surrey home, while East Surrey will cover Epsom and Ewell, Elmbridge, Tandridge, Reigate and Banstead, and Mole Valley. West Surrey will be the larger of the

two authorities, but will also have its share of financial challenges given the debt issues in Woking, Surrey Heath and Spelthorne.

Next year voters will go to the polls to elect their new representatives to sit in a shadow council before taking over in 2027. It means 2026 will be the last full year for councils to achieve any remaining goals. The Local Democracy Service asked council leaders what they hoped to achieve before this seismic shift in how services are delivered in Surrey.

Councillor Bridget Kendrick, leader of Mole Valley District Council, said: "I can't believe how quickly the past year has gone and how much we've achieved in line with our vision for a fairer, greener Mole Valley that provides opportunities for all." She said highlights included delivering their best-ever programme of holiday activities for over 1,500 children, signing a Poverty Pledge that recognises and builds on their support for vulnerable people across Mole Valley, and progressing the development of much-needed small business units and housing on the Foundry site in the centre of Dorking. Other milestones included submitting a planning application for the regeneration of the Swan Centre and Bull Hill. The leader also singled out the council's action on homelessness, which she said prevented 233 households from becoming homeless, delivered 36 emergency housing units and 72 new affordable homes.

She added: "It's with a sense of nostalgia that I recognise next year's annual plan as the final one from Mole Valley District Council as we know it. From April 2027, the new East Surrey authority will take over, but until then we'll continue delivering for our residents and have a very busy schedule ahead. Our plans to refurbish playgrounds in Ashtead, Bookham, Dorking and Leatherhead are progressing, with a destination playground planned for Riverside Park. We also have a very ambitious action plan for increasing biodiversity in Mole Valley, including rewilding, planting additional species and introducing additional ponds. The second phase of works for Dorking Halls is scheduled for this spring to ensure the venue is accessible and ready to welcome future visitors. Pippbrook House, our Grade II listed building, is growing in strength as a cultural hub with a packed list of events planned for the coming months and unique rooms available for community hire.

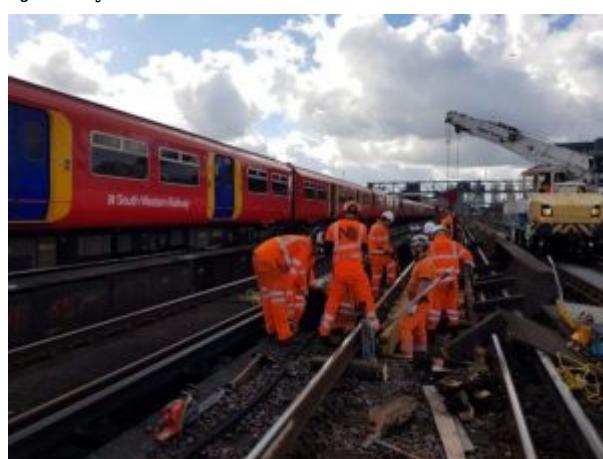

"We're also pleased to confirm that funding has been obtained to continue the work of our incredible MV Employment Hub, delivering job advice and support to hundreds of residents. We're planning another successful year of summer holiday activities, and our bursary scheme financially supporting children to access sports clubs' membership is open for applications. Mole Valley Life team continues to support the most vulnerable in the district, providing lifeline alarms and support services via our Fairfield Community Centre. On a more practical side, parking improvements are planned for next year and we're procuring a new waste contract to commence from June 2027 too. As we head into what I know will be a busy and productive final year for Mole Valley District Council, I'd like to take this moment to wish everyone a very Merry Christmas and a peaceful New Year."

## Christmas trains and buses in Surrey

14 January 2026

Heading out over Christmas? Here is what Surrey buses and trains are actually doing this festive season.

If you are planning to get around Surrey over Christmas and New Year - whether that is popping into town for Boxing Day sales, visiting family or braving a London trip - it is worth knowing now that services will be patchy, quieter and sometimes non-existent.

Here is the lowdown:

### Christmas Eve - Wednesday, December 24

Most buses will run as normal, but:

- No night buses
- Some evening services will finish earlier than usual

A few operators (including Stagecoach and First Berkshire) will switch to a Saturday timetable, so buses may be less frequent later in the day. Essentially it will be fine to take a bus during the day, do not rely on late buses coming home from the Christmas Eve pub crawl.

Trains on Christmas Eve will also wrap up quickly:

- Trains finish early - around 10pm
- Island Line services finish even earlier

□

### Christmas Day - Thursday, December 25

The only services running are a handful of special routes, mainly:

- Carline's 442/X442
- A couple of First Berkshire and Metrobus routes

For most of Surrey, there will be no buses.

South Western Railway has also confirmed there will be no trains running.

□

### Boxing Day - Friday, December 26

Still very quiet.

- Many areas will again have no bus service
- Some operators will run a Sunday-style timetable

If you do need to travel, check your route carefully as services vary wildly by operator.

South Western Railway has also confirmed there will be no trains running.

□

### Saturday & Sunday, December 27-28

The good news is this is when things feel more normal again as standard weekend bus services return.

The bad news is this is when there are major train disruptions.

- No trains between London Waterloo and Clapham Junction
- Trains from Surrey will start and finish at Clapham Junction

If you're heading into central London, you'll need to:

- Change onto the Tube (District Line from Wimbledon or Richmond)
- Or use other rail operators via Reading, Portsmouth or Epsom

□

### **Monday 29 to Wednesday 31 December**

Most buses switch to a Saturday timetable, meaning:

- Fewer buses
- Longer gaps between services

On New Year's Eve, there will again be:

- No night buses
- Early finishes on some routes

For trains

- Services via Barnes still stop at Clapham Junction
- Reduced services elsewhere
- Some central London stations closed

□

### **New Year's Day - Thursday, January 1**

Much like Boxing Day:

- Very limited services
- Mostly Sunday timetables where anything is running at all

Trains:

- Reduced services
- Many trains still start and finish at Clapham Junction

□

### **From Friday, January 2**

Services mostly return to normal, though some operators will ease back in with Saturday-style timetables.

When does it go back to normal? Monday, January 5, 2026. When most people are back at work.

□

The simple advice is to check before you travel, even if you 'know' your route. If you are heading into London, Clapham Junction (rather than Waterloo) will be your point of entry. Travel early when possible - late services are the first to disappear - unless you want an expensive taxi back home.

Engineers say the disruption will lead to more reliable journeys long-term, but for now, Surrey residents should expect a festive period that's a little more stop-start than usual.
