

## Council elastic on plastic?

In March 2019 Epsom and Ewell Council agreed to phase out its use of single-use plastics. How is it getting along? Judge for yourself from the reply of Councillor **John Beckett** (Residents Association – Auriol Ward) to a progress report demanded by Councillor **Julie Morris** (Liberal Democrat – College Ward) at the Council meeting 6th December.

The Chairman of the Environment and Safe Communities Committee reported:

“Since adopting the Single use Plastics Policy as part of the Climate Change Action Plan, the Council has been working to support the reduction in the use of single use plastics within its own operations and across the Borough. We have utilised our communications channels and public events to improve awareness and to support wider behaviour change of our residents and businesses. We installed refillable water stations in 6 of our parks and opens spaces and in our Market place, to encourage use of reusable water bottles,. We have also supported all non-food stall and dry food greengrocers at Epsom Market to stop using single use plastic carrier bags, run a reusable Tote bag giveaway event, and committed to making the Market place Single use Plastic free by April 2024.

We have also reviewed the Council’s own operations to understand where we can reduce single use plastics. We have removed all plastic cups from our operational buildings, encouraging staff to use reusable bottles and cups. We replaced the depot’s old container-based water cooler with a plumbed-in version. We have also introduced segregated office recycling bins to enable improved recycling of plastics in our buildings.

We have stopped buying plastic-based refreshment supplies where possible but where it hasn’t been possible to find a viable alternative, we are unfortunately having to continue to use that option. This does not mean that we will just accept the products but will continue to look at alternative options now and in the future.

As the Climate Change Action Plan is a living document and with changes to industry constantly evolving, we will continue to review our operations for further opportunities to reduce the need for Single use Plastics. This work will also involve partnership working with Surrey County Council, through the Surrey Environment Partnership, to support the delivery of the Single-use Plastics Strategy for the whole of Surrey.

Regarding the small milk pots which are currently used at the hot drink’s machines in the members room, council chamber and committee rooms, alternative options are being looked at with the intention for these to be discussed at the January Climate Change Working Group meeting. After an initial conversation with the councils recycling officer, it is believed that the material used in the pods might be the same as yogurt pots and the solution might be as simple as removing the foil lid and having a separate container for these to be recycled at these locations.

Whilst we acknowledge it wasn’t called an audit a review has taken place of Single use Plastic use and subsequent action taken as highlighted in this reply. Since then, the issue of SuP and the 5 pledges have been incorporated into the climate change action plan and will continue to be picked up through delivery of the plan. These actions are also now robustly supported by incorporating SuP consideration into all our procurement processes. The climate change action plan has member oversight and officer resource attributed to secure its delivery and continuous review.”
