

Epsom welder's widow seeks help with cancer claim

17 August 2024

A woman who believed her incurable cancer may have been caused by washing her husband's work clothes is looking for information. Annette, who was married to a former welder in Epsom and Ewell, is appealing for information following her diagnosis with an incurable form of cancer linked to asbestos exposure.

Asbestos is a naturally occurring mineral composed of thin, needle-like fibres which was widely used in construction. Asbestos was completely banned in 1999 after research showed swallowing and breathing in the fibres trap them in the body, inflaming and scarring the lungs which can cause cancer.

Peter Vaughan, Annette's husband, worked as a welder around Epsom and Ewell throughout the 1960s, 70s and 80s, where he is believed to have come into contact with asbestos used in insulators for buildings and machinery such as asbestos blankets or gloves.

Annette claims she may have been exposed to asbestos while washing Peter's work clothes, if he came into contact with asbestos while at work. Annette was diagnosed with the rare and aggressive cancer, mesothelioma, in summer 2023 - six years after Peter sadly died in 2017.

Now, with the help of legal firm Leigh Day, Annette is appealing to Peter's former colleagues to help her with information about conditions at his work. She hopes the information will help her bring a legal claim as she faces the incurable disease.

"Mesothelioma is an aggressive, terminal form of cancer which can develop in an individual later in life even through secondary exposure to asbestos," said Claire Spearpoint, asbestos claims solicitor at law firm Leigh Day. "Annette believes that this may have been the case with her diagnosis, however following Peter's death she has limited access to information regarding the possible presence of exposure at his former places of work."

Leigh Day is looking to support Annette's claim by speaking to anyone who worked at Surrey Sheet Metal Crafts, Grundy Teddington and Vestec throughout the 1960s to 1980s. They may be able to offer information if asbestos was used and how asbestos exposure occurred. Annette is also hopeful that any local tradesmen who worked in the Epsom and Ewell area at the time may be able to offer information that could be of help.

Peter worked as a welder and director at Surrey Sheet Metal Crafts between 1965 and 1967, a company he set up with two other men. He was then employed at Grundy Teddington in the Twickenham and Teddington area throughout 1970 to 1971, before working at Vestec for 12 years between 1975 and 1987. During his time at Vestec, he was a supervisor and often referred to as 'guvnor'.

While former employees who overlapped with Peter at these companies would be particularly useful, Annette is also looking to speak to anyone who worked at Surrey Sheet Metal Crafts, Grundy Teddington or Vestec who could offer information on the kind of work undertaken.

All three companies are no longer in existence and have been dissolved, one as recent as March 2024. If you can provide any relevant information please contact Claire Spearpoint at: cspearpoint@leighday.co.uk
