

ME/CFS Service Open Afternoon

The ME/CFS Specialist Service at the Malvern Centre, Sutton Hospital is hosting an open afternoon on Wednesday 10th May 1-3pm during ME Awareness Week.

The open afternoon is to raise awareness of ME/CFS as a long-term condition with a wide range of symptoms, not only extreme tiredness. Come along and find out more about the other symptoms, how it is diagnosed and what evidence-based interventions we offer.

All welcome, people with ME, their family members/friends and health professionals including GP's and hospital staff. We have invited a speaker from the ME Association which you can listen to whilst enjoying coffee and cake. We will have information stands and staff will be available to answer any questions.
