

## Surrey to get new recycling centre?

26 February 2025

Newspapers, cardboard, plastic bottles and tins of tuna could have a new home to go to in Surrey. Plans for a new recycling centre are on the cards on farmland in Chertsey as the existing infrastructure is “under strain”, a new report says.

Surrey County Council is proposing to build a dry material recycling centre on Trumps Farm, just off the M3. An outline planning application has been submitted and an outline business case has been developed, with a decision hopefully being made in May 2025.

Waste like metal, cardboard and plastic would be collected at the kerbside and then separated from mixed items like paper, card, plastic, metal and glass into single material streams. These streams are then sent on to reprocessors to turn into new products.

Trumps Farm, owned by the county council, was identified as the most suitable location for a recycling facility as it is North West Surrey, closest to where the highest levels of waste are produced, according to the council report. The size of the proposed facility will provide capacity for Surrey’s dry recycling now and into the future, the document said.

The county’s ability to recycle and get rid of waste is under “significant strain”, according to a council report. A report in 2023 highlighted a strain on the current recycling infrastructure and a lack of dry mixed recycling centres in the county.

“If we’re going to build and invest in a recycling centre, we need to up our recycling rates,” said the Leader of the council, Tim Oliver at a cabinet meeting on February 25. He urged members to “renew their energy” for recycling around the districts and boroughs.

The Conservative leader said recycling rates around Surrey had stagnated at around 50 per cent and perhaps residents were not sure what can and cannot be recycled. He added: “I have persuaded my wife to look at a package before she puts it in the bin because it does tell you whether it’s recyclable or not.”

Responsible for around 90,000 tonnes of recycling in Surrey, the council is hoping to find an operator to process all this material without changing the current district and borough collection regimes. These authorities are Epsom & Ewell, Elmbridge, Guildford, Runnymede, Spelthorne, Surrey Heath, Tandridge, Waverley and Woking.

Use of third-party sites to manage recyclable materials collected by the District and Boroughs on the county’s behalf has been increasingly expensive and the service has no control over costs or the separation processes. “Surrey County Council will need greater control over its supply chain and associated infrastructure,” according to a new report.

Imminent waste legislative changes could put the county council at risk of not meeting its duty as the Waste Disposal Authority. The new legal rules include: collection packaging reforms and extended producer responsibility (meaning the need to collect and recycle a broader range of materials) and a new levy on fossil fuel waste which could cost the council up to £10m a year.

The report said: “The delivery of a Surrey material recycling facility will work to mitigate these financial pressures by increasing recycling, particularly with regard to plastics and provide revenue savings which can offset these costs.”

In the event that Surrey was split into a number of unitary authorities that were responsible for waste disposal, the county council said the continued use of strategic waste management facilities would be managed through agreements between local authorities.
